

BLUBOX™

get the picture?

Share and protect your digital photographs with Blubox™ - the worlds most advanced software application for the compression and encryption of digital images.

Blubox™ dramatically improves the digital photo sharing experience and ensures the protection of personal information at all times. Blubox™ allows the digital camera user to email and upload multiple, hi-resolution photographs and even entire photo albums without compromising picture quality.

up to 95% compression

Blubox™ uses the latest image compression techniques to reduce digital photographs and other image formats by up to 95% without resizing or sacrificing quality. At the touch of a button, files can be extracted back to their original format.

256-bit encryption

Blubox™ protects your photographs and other files using secure 256-bit AES encryption making it virtually impossible for anyone to access them without your express permission. Simply drag and drop your photos into Blubox™ and in seconds your data will be secure and protected.

instant access

Encrypted and compressed the Blubox™ application offers complete and instant access to all your photograph and image files without ever having to uncompress or unzip them first! Unlike other compression products, Blubox™ lets you view, print and manipulate your photographs and images without the need to remove them from the secure Blubox™ environment.

secure email attachments

Email upload and download times can be reduced by up to 95% - an entire album can be emailed in the time it would usually take to send just a couple of pictures. Always protect your private data by sending it in a secure and encrypted Blubox™ archive.

free Blubox™ viewers

The FREE Blubox™ Viewer means you can share your Bluboxes with friends and family allowing them to view, print & extract your photographs and images - with your permission of course! The Blubox™ Viewer is freely available to download from the Internet, just look out for the Blubox Eye™ symbol.
