Overview Summary

The Microworld MOCAB13 is a 6 pin Female PCI-e to 6 pin Male PCI-e power cable designed for compatible desktop PC power connections. It provides a direct connection between matching 6 pin PCI-e power connectors and can be useful when additional cable reach or connection flexibility is required inside a computer case.

Its compact cable format makes it suitable for desktop PC builds, graphics card installations, upgrades and internal cable management where compatible 6 pin PCI-e power connections are required.

Performance tier: Standard

Uses: Desktop PC builds, graphics card power connections, PCI-e power extension, PC upgrades, internal cable management

Description

The Microworld MOCAB13 6 pin Female PCI-e to 6 pin Male PCI-e cable is designed for compatible desktop computer power configurations that require a 6 pin PCI-e connection. The cable provides a female 6 pin PCI-e connector on one end and a male 6 pin PCI-e connector on the other, allowing compatible PCI-e power connections to be joined within a PC system.

This type of cable can be useful during desktop PC assembly, graphics card installation or system upgrades where the available PCI-e power cable requires additional connection flexibility. Its compact form is also suitable for installations where cable routing and internal space are important considerations.

The MOCAB13 is intended specifically for compatible PCI-e power connections. Before installation, check that both the power supply and connected hardware use the required 6 pin PCI-e connector and that the cable configuration is suitable for the intended system.
