Specifications

Overview:

The B401d A4 mono desktop printers offer outstanding quality and duplex printing with fast, reliable performance, all in a low cost, compact and highly competitive priced device.

Features:

Efficient working that improves productivity

The use of High Definition digital LED technology achieves a superior level of print quality. The 330MHz processor and 64MB memory combined help to deliver a fast first page out time and fast throughput. Plus, a generous standard 250-sheet paper tray and a convenient multi-purpose tray (MPT) with flexible media handling of up to 220gsm lets you print longer runs.

Energy saving features that reduces your impact upon the environment

These outstanding devices have many features that reduce your impact upon the environment, whilst also reducing your on-going costs. A pre-set option automatically powers off devices when not in use. This is in addition to our Deep Sleep mode that places the printers to sleep when not in use and powers up as you request to print a job.

Reliability you can depend upon

OKI printers are inherently more reliable due to LED technology requiring fewer moving parts.
