## Specifications

**Overview:**

- Compatible with 10" to 15.6" laptops and most tablets
- Ergonomic design with 6 adjustable angles to avoid neck and back pain
- Foldable ultra-mince and light structure for maximum portability
- Optimum thermal dissipation thanks to its fully open laptop platform and aluminum construction
- Safety hooks and non-slip skates to prevent the device from falling
- Ultra-resistant aluminium body
- Transport pouch included

**Features:**

Courchevel is a backpack which is both robust and lightweight, designed to transport your laptop. Its modern and popular style was developed by our designers in our creative studio in Paris.

Courchevel has a padded interior compartment to provide optimal protection for your laptop. You will also find a compartment which fits tablets up to 10.1", as well as a large compartment with organiser for storing your documents and accessories. This backpack also has a large front pocket with plenty of storage, meaning you can organise your belongings your way.

The metal logo and zippers offer optimum quality and durability.

For optimal comfort, our designers have opted for a padded back, shoulder strap and handle. In addition, the entire backpack is fully padded, providing extra protection for all your belongings and your computer equipment.

On each side of the backpack there is a zipped pocket, with an additional mesh pocket on the left side, which is very convenient for carrying a bottle of water, for example.

The bottom of the backpack is reinforced - no more worries about damaging the contents of your backpack if you drop it suddenly on the ground.

This backpack also has another, not insignificant, feature: a waterproof cover to protect your belongings from rain or even moisture. Indeed, below the backpack there is a hidden zipped pocket containing this waterproof neon cover, a very practical colour since, as well as offering protection from rain, it allows you to be seen from afar by motorists when walking or even cycling.
