Kaspersky Pure 3.0 Total Security - 3User

Product Overview

Kaspersky Pure 3.0 Total Security - 3User - Sierra. Ulimate PC protection for your home. Award-winning protection against all types of Internet threats.

Specifications

Overview:

Ultimate PC Protection for Your Home
For the ultimate PC security solution, choose Kaspersky PURE 3.0 Total Security. It delivers everything you need to protect your PC - including your digital identity and your documents, photos, music and passwords - against the latest, sophisticated malware and Internet threats. With special features that add further layers of protection when you're online shopping or banking, Kaspersky PURE 3.0 also secures your money and your accounts against cybercriminals.

Benefits:

Award-winning protection against all types of Internet threats
Online shopping, banking and social networking can leave your PC vulnerable to viruses - and your digital identity & finances exposed to criminal attacks. Kaspersky's innovative hybrid protection approach combines powerful security technologies running on your PC and the real-time efficiency of the cloud. As a result, Kaspersky PURE 3.0 Total Security delivers a faster, more effective response to today's ever-evolving threats. In addition, Kaspersky's new Automatic Exploit Prevention technology blocks attacks that try to gain control over your PC or steal your personal data by exploiting vulnerabilities within commonly-used applications. With Kaspersky PURE 3.0, you can enjoy the Internet to its full potential - without threats or disruption.

Secure online banking and shopping - with Kaspersky's unique Safe Money technology
Whenever you use online banking, shopping websites or online payment systems, Kaspersky PURE 3.0 provides additional layers of protection. Kaspersky's unique Safe Money technology ensures that the website you're visiting is secure - to prevent you from being exploited by a fake or phishing website. Safe Money will also offer to open your chosen website in a special, protected mode - so your credit card number and other personal data cannot be accessed by cybercriminals.

Real-time, proactive and cloud technologies detect new, emerging and unknown threats
Because new Internet threats emerge with amazing speed, Kaspersky protects your PC by using real-time data from the cloud. With the cloud-based Kaspersky Security Network constantly gathering data from millions of consenting users' systems, Kaspersky can protect you from suspicious activity on your PC. Potential threats are monitored and analysed in real-time - and

dangerous actions are completely blocked before they can cause harm.

Protects your digital identity and your privacy
Kaspersky's latest cloud-based and proactive anti-phishing technologies defend you - and your digital identity - against online fraudsters. In addition, Kaspersky PURE 3.0 includes two unique technologies - Secure Keyboard and Virtual Keyboard - that deliver additional protection against keyloggers, hackers and identity thieves when you're entering personal information online. Furthermore, Kaspersky's Password Manager* generates strong passwords, securely stores your passwords in an encrypted vault and automatically logs you on to websites and applications. A new, cloud-based feature also allows you to synchronise your passwords across multiple PCs.

Scheduled backup protects your photos, music and financial data
Easy-to-use backup and restore features help you to protect your precious photos, music and financial documents - so they're still available if you suffer a hard disk crash or if your PC is lost or stolen. Kaspersky PURE 3.0 also includes 2 GB of Online Backup - so you can access your online backup from any computer with an Internet connection.

Encrypted vaults securely store your valuable files
Kaspersky PURE 3.0 lets you create a special secure vault to store valuable information. All information in the vault is encrypted and the vault is also protected by its own password. Your encrypted information can't be accessed by hackers and criminals, but you can safely transfer your confidential data from one computer to another.

PC Cleanup tools help to keep your PC running smoothly
On every PC, Internet browsing history and deleted files can adversely affect performance and leave PCs vulnerable to attacks. Kaspersky PURE 3.0 includes special PC Cleanup tools that can permanently 'shred' your deleted documents and delete your surfing history, temporary files, cookies and the contents of your Recycle Bin. PC Cleanup means you can protect your privacy and digital identity, while also ensuring your PC keeps running smoothly.

Hassle-free protection that helps to preserve your PC's performance
Kaspersky PURE 3.0 provides everything you need to protect your PC - with minimal impact on your PC's performance and without constantly distracting you with alerts and queries. Kaspersky PURE 3.0 has been optimised to work behind-the-scenes - checking the reputation of all applications and websites that you access, analysing the behaviour of programs, automatically updating its own databases… and more. With Kaspersky PURE 3.0 protecting your PC and your data, you can enjoy our ultimate protection - without it noticeably affecting the speed of your PC.

Easy, centralised security management of multiple PCs… from a single PC
Kaspersky PURE 3.0 makes it incredibly simple to manage the security of multiple PCs in your home. From one PC, you can easily view and control all security tasks - including running scans, updates and backup tasks, fixing security issues, remotely managing parental controls… and more. Maintaining the security of your PCs has never been easier or more convenient.

Award-winning parental controls keep your children safe online
Kaspersky PURE 3.0 includes award-winning parental controls - to help keep your children safe and responsible. In addition to controlling your children's access to the PC, Internet, applications, games and websites, you can also block, limit or log Instant Messaging and social networking. Furthermore, it's easy to control file downloads and you can even block the transfer of private data - such as phone and credit card numbers.
*Password Manager is not available for x64 operating systems, applications or browsers.

Features:

New! Safe Money - adds more protection for financial transactions
Whenever you log onto an online shopping, banking or payment website, Kaspersky's new Safe Money technology offers automatic protection. It checks the website's URL against a list of secure sites, verifies the site's security certificate and also scans your PC's operating system to check for any related vulnerabilities. Safe Money also automatically suggests that the site is opened in the special Safe Money mode - to help further protect your personal data against theft.

New! Secure Keyboard & improved Virtual Keyboard - help protect your identity
When you open a bank or payment website - or enter a password on a website - Kaspersky's Secure Keyboard technology automatically prevents keyloggers from accessing the personal data that you type on your keyboard. Furthermore, Kaspersky's improved Virtual Keyboard technology lets you input confidential data without even using a keyboard - so your information is safe from capture by 'screen scrapers', keyloggers and more.

New! Automatic Exploit Prevention - defends against the exploitation of vulnerabilities
Malware is increasingly targeting vulnerabilities within commonly-used PC applications. Kaspersky PURE 3.0 Total Security includes a new technology - Automatic Exploit Prevention - that blocks malware from exploiting such vulnerabilities. Automatic Exploit Prevention scans your PC for vulnerabilities and controls the actions of any programs that have vulnerabilities. It blocks exploits by:

- Controlling the launch of executable files by any applications that have vulnerabilities
- Analysing the behaviour of executable files - to identify any similarities with known malicious programs
- Restricting the actions that can be undertaken by applications that have vulnerabilities

New! Password Manager now includes Password Sync
Kaspersky's Password Manager not only enhances your security - by generating secure, random passwords - it also automatically logs you onto your website accounts and applications, including Skype and Instant Messenger. Now, with the new Password Sync feature, Kaspersky PURE 3.0 securely stores your passwords online in the cloud. With Password Sync, you can safely access your passwords from any PC and be automatically logged onto your chosen websites and applications.

New! Online backup - makes data backup even more convenient
If your PC fails, Kaspersky's flexible backup features mean you can still access your documents, photos, music and other files. Kaspersky PURE 3.0 lets you backup your data onto your hard drive, removable media or a range of other physical storage. In addition, the new Online Backup feature allows you to store up to 2 GB of backup files online, via Dropbox - so you can use any PC with an Internet connection to access your backup.

Secure vaults - protect your most precious data
With Kaspersky PURE 3.0, it's easy to create a special, secure vault to store your most valuable information. Kaspersky encrypts all data that is stored in the vault and access to the vault is password-protected - to defend the vault against hacker attacks.

PC Cleanup tools - add security and help you preserve PC performance
Easy-to-use PC Cleanup tools add to your security by letting you 'shred' deleted documents and delete your Internet browsing history. This helps to protect your privacy, prevent attacks by cybercriminals and keep your PC running more smoothly.

Home Network Control - simplifies management tasks across multiple PCs
Kaspersky PURE 3.0 includes Home Network Control - to make it easy for you to launch scans, run updates, backup data and manage the security of multiple PCs on your home network - via a single PC.

Parental Control - helps to keep your children safe online
Kaspersky PURE 3.0 makes it easy to monitor and limit your children's online activities, communications and general PC usage. Convenient controls help you to protect your children from harmful Internet content or inappropriate websites, prevent downloads of specific types of files and also block communications with unwanted contacts via instant messaging or social networks.

Specifications	
Product Code	2002716
Hardware Requirements	Operating Systems
Intel Pentium 800 MHz or higher (or equivalent)	Microsoft Windows XP Home Edition (Service Pack 3 or higher)
512 MB available RAM	Microsoft Windows XP Professional (Service Pack 3 or higher)
	Microsoft Windows XP Professional x64 Edition (Service Pack 2 or higher)
Intel Pentium 1 GHz 32 bit (x86) / 64 bit (x64) or higher (or equivalent)	Microsoft Windows Vista Home Basic (32 / 64 Bit) (Service Pack 2 or higher)
1 GB available RAM	Microsoft Windows Vista Home Premium (32 / 64 Bit) (Service Pack 2 or higher)
	Microsoft Windows Vista Business (32 / 64 Bit) (Service Pack 2 or higher)
	Microsoft Windows Vista Enterprise (32 / 64 Bit) (Service Pack 2 or higher)
	Microsoft Windows Vista Ultimate (32 / 64 Bit) (Service Pack 2 or higher)
Intel Pentium 1 GHz 32-bit (x86) / 64-bit (x64) or higher (or equivalent)	Microsoft Windows 7 Starter (Service Pack 1 or higher)
1 GB RAM (32-bit) or 2 GB RAM (64-bit)	Microsoft Windows 7 Home Basic (32 / 64 Bit) (Service Pack 1 or higher)
	Microsoft Windows 7 Home Premium (32 / 64 Bit) (Service Pack 1 or higher)
	Microsoft Windows 7 Professional (32 / 64 Bit) (Service Pack 1 or higher)
	Microsoft Windows 7 Ultimate (32 / 64 Bit) (Service Pack 1 or higher)
Intel Pentium 1 GHz 32-bit (x86) / 64-bit (x64) or higher (or equivalent)	Microsoft Windows 8
1 GB RAM (32-bit) 2 GB RAM (64-bit)	Microsoft Windows 8 Pro
	Microsoft Windows 8 Enterprise
Intel Pentium 1 GHz 32-bit (x86) / 64-bit (x64) or higher (or equivalent)	Microsoft Windows 8.1
1 GB RAM (32-bit) 2 GB RAM (64-bit)	Microsoft Windows 8.1 Pro
	Microsoft Windows 8.1 Enterprise
Required for all installations	Approximately 700 MB free space on the hard drive (depending on antivirus database size)
	CD-ROM or DVD-ROM drive - for installing Kaspersky PURE 3.0 from CD
	Computer mouse or other suitable pointing device
	Internet connection - for activating Kaspersky PURE 3.0
	Microsoft Internet Explorer 8.0 or higher
	Microsoft Windows Installer 3.0
Hardware requirements for netbooks	Intel Atom 1.6 GHz (Z520) - or compatible
	1GB DDR2 available RAM
	Video adapter: Intel GMA950 with at least 64 MB of memory - or compatible
	Screen size: 10.1 inch, with 1024x600 resolution - or above
