Preset Customized Options with just a Click
OnScreen Control allows you to modify your screen configuration by a few clicks without forcing physical buttons built in monitor. My Display Presets offers customized picture mode for specific software.It has automatically applied to picture mode you already preset. You don't need to select the picture mode each time.

Customize Your Workspace for Multitasking

Screen Split divides the display into multiple sections for different tasks by resizing the windows on the screen. Its advanced options have expanded to include 4 types of Picture-in-Picture(PIP) Mode among 14 options. With PIP Mode you can work on the main screen while watching a video in a smaller window floating on the screen.

Offers Improved Color Vision to Color Weakness

Color revision algorithms are used to help those with color weakness who have difficulty distinguishing certain ranges of colors can view all the important content.
