Specifications

Features:

Exceptional screen clarity.
The Dell 24 Ultra HD 4K Monitor - P2415Q is 23.8" of gorgeous 3840 x 2160 resolution. That's over 8 million pixels - with four times more detail than Full HD resolution. The high pixel density helps you see extremely fine details onscreen so you can view and edit higher resolution photos and more. Create your masterpiece with more clarity and color enhancement - all at a price you can afford.

Nearly perfect color accuracy.
You can count on natural and consistent color across different mediums because each monitor is factory tuned at 99% sRGB with a color calibration factory report certifying that each monitor has a deltaE < 3. That means you get precise color coverage right out of the box at an amazing high-color depth of 1.07 billion colors. Each hue remains consistent from virtually any viewpoint with an ultra-wide viewing angle at 178 degrees/ 178 degrees.

Full adjustability.
Enjoy every detail the Dell 24 Ultra HD 4K Monitor - P2415Q provides in total comfort, thanks to full adjustability.

- The included stand enables tilt (5 degrees forward or 21 degrees backward), pivot, swivel and even provides built-in cable-management.
- Customize your viewing experience with a height-adjustable stand, or save desktop space by detaching the stand for wall mounting with a VESA-compatible 100mm x 100mm wall mount kit. (Wall mounting equipment sold separately.)
