Overview Summary

Creality K2 Pro PTFE Tube & Connector 4004010290

This Creality PTFE tube and connector kit is a direct-fit replacement designed specifically for the K2 Pro 3D printer filament path system. It ensures stable filament delivery by reducing friction and preventing feed interruptions during long or high-speed prints. The PTFE tube provides a smooth internal channel for 1.75mm filament, while the pneumatic connector locks the tube securely into place to avoid slipping or misalignment.

Built as an OEM component, this part helps maintain optimal printing accuracy, especially when the original tubing shows wear, clogging, or reduced grip. It is ideal for restoring consistent extrusion performance and minimizing print failures caused by filament drag or tube deformation.

Performance tier:Entry level maintenance component

Uses:3D printer maintenance, filament feed replacement, extrusion system repair, PTFE tube upgrade

Description

The Creality K2 Pro PTFE Tube and Connector is engineered to support reliable filament movement through the printer's extrusion pathway. Designed as a direct OEM replacement, it restores the original filament routing performance by reducing internal friction and ensuring a secure connection between tubing and extruder inlet. This helps maintain stable extrusion pressure and reduces common issues such as under extrusion, clogging, or filament slipping.
