Sharkoon FireGlider Optical - 7 buttons

Product Overview

Sharkoon FireGlider Optical - 7 buttons, 5 of them freely programmable, DPI switch with color display (5 steps), Retail Box

Specifications

Overview:

Some things just simply cannot be improved upon. Some things have simply proven their mettle time and time again over the course of the last decade. This is why we've now outfitted our FireGlider with an optical sensor supporting up to 3,000 DPI and 3,600 FPS.

The ergonomically shaped body of this gaming mouse, with its reduced flame design, fits comfortably in the hand with the thumb pad providing a solid grip in even the most hectic gaming situations. With the Weight-Tuning-System situated in the bottom of the mouse, up to 19.5 grams can be added to maximize personal comfort and performance in 7 different configurations.

Five of the seven buttons are fully programmable for various functions through the included software. These programming options enable easier day-to-day operations as well as improving performance in gaming applications. In addition, through the software, users can save individual macros to the on-board memory.

Via the DPI selector, the resolution can be adjusted in five levels from 400 to a maximum of 3,000 DPI. The selected DPI level is represented by various colour combinations on the mouse.

The FireGlider Optical weighs up to 135 g, has a 1.8 m long cable and connects to computers via USB. Procure the best advantage possible with the SHARKOON FireGlider

Features:
