Sharkoon LIGHT Gaming Mouse

Product Overview

Sharkoon LIGHT Gaming Mouse, 16000DPI, Retail Box

Specifications

Overview:

Lighter than light = Light²: For the fastest mouse movements and the most precise maneuvers, we've mercilessly reduced the Light² 200 down to its bones. With a weight of only 62 grams, this is not only our lightest mouse. It's one of the lightest ever produced. All physical limits are nullified with its highly precise sensor of up to 16,000 DPI, an ultra-flexible cable, and five mouse feet made of pure PTFE for extreme sliding properties.

Features:

Lightness through Structure.
Due to the honeycomb structure of the sides, underside and the top surface, the weight of the gaming mouse has been reduced to its most essential. With only 62 grams, the Light² 200 is as light as air under your fingertips and enables fluid movements without noticeable resistance or fatigue.

Technology at eSport Level.
The optical PixArt 3389 sensor of the Light² 200 provides a professional resolution of up to 16,000 DPI. This can be modified for any gaming genre via the wide-ranging gaming software. In addition, the most important actions can be instantly performed with the help of the six programmable buttons.
