Specifications

Features:

MHL (Mobile HD Link)
Connect and watch HD content from your phone on the TV's large screen with your MHL cable and control it with the TV's Magic Remote. The phone is also charged while it is connected.

Comfortable 3D Glasses
CINEMA 3D glasses are light, flicker-free, battery-free, hassle-free and economical, allowing for greater viewing comfort and convenience.

Flicker-Free 3D
Unlike conventional 3D TV, LG CINEMA 3D Smart TV is certified flicker-free and also provides brighter 3D images. It's easier on the eyes, delivering clear and crisp 3D that jumps out of the screen.

IPS Panel
The secret behind LG TV's superior viewing angle and quality is the panel. Just as the quality of the beans determines the quality of the coffee, the quality of the panel determines the quality of the TV. The IPS Panel used by LG is the reason why LG LED TVs have clearer, more consistent, and sturdy screens.

LED
Brilliant LED backlighting display delivers crystal-clear images, true blacks, and the most vivid, life-like colors on a slim screen.

Dynamic MCI 100
Motion Clarity Index is a comprehensive indicator of the genuine clarity of fast motion display, incorporating factors beyond mere frame rates. LG's detailed backlight scanning, advanced local dimming and powerful engine all add to a superb performance in reducing blur in fast-moving pictures.

Triple XD Engine
excellence in Color, Contrast, and Clarity for the best picture quality and performance.LG's latest and most advanced Triple XD Engine brings the highest level of Color, Contrast, and Clarity

Resolution Upscaler
Viewers can enjoy your content in high-resolution. Very often is the case that external content from the net or devices look bad on TV due to low resolution of the files. LG provides a solution with Resolution Upscaler, which magically improves the resolution of original content and makes them look good on the big screen as well.

Clear Voice II
Clear Voice II automatically recognizes and enhances the volume of human voices in movies and shows to make them more audible against background sound.

Smart Energy Saving
The Backlight Control function controls the brightness of the TV. The Screen Off function lets you switch off the screen while keeping the audio on. Standby Mode Zero function sets your TV to a power saving mode where zero electricity is used.

HDMI
Consolidation of HD video, audio, and data in a single cable enables high speed communication.
