Netix Large Thermal Paste 25g Syringe Dispenser

Product Overview

Netix Large Thermal Paste 25g Syringe Dispenser

Specifications

Overview:

The UniQue Heatsink Compound Thermal Paste also known as Thermal Interface Material in a 25g Syringe Dispenser is designed to Increase the Thermal Conductivity Between Main Processor And Heat Sink and Helps Disperse The Heat Effectively, Apply to CPU, VGA, Chipset, Radiator And Other PC Components. Its main function is to transfer the heat radiated by the CPU to the heat sink, keep the CPU temperature at a level that can work stably, prevent the CPU from being damaged due to poor heat dissipation, and prolong the service life. It acts on electronic components, electricians, household appliances, LCDs, LEDs, CPU coolers and other products to increase heat transfer function, filling gaps, insulation, waterproof, moisture, shockproof, etc.; it can also be filled between electronic components and heat sinks. It wets the contact surface sufficiently to form a very low heat resistance surface, which is much more efficient than other heat sink products.

Features:

- Stock Code 43215
- Description UniQue Heatsink Compound Thermal Paste 25g Syringe Dispenser
- Product Type Thermal Interface Material Designed To Increase The Thermal Conductivity Between Main Processor
- Increases Thermal Conductivity Between CPU, VGA, Chipset And Other PC Components And The Heat Sink
- Helps Dissipate Damaging Heat To Prolong Product Life
- Syringe Dispenser With Resealable Cap For Precise And Easy Application
- High Grade Stability & Reliability
- Low Thermal Resistance And High Conductivity For Superior Heat Transfer
- High Temperature Resistance
- Non-Toxic, Tasteless And Non-Corrosive
- Colour grey
