Product Overview

HP 4P5P9AA HyperX Pulsefire Haste Gaming Mouse USB - Black, 6 buttons, TTC golden Micro dustproof Switch, PixArt PAW3335 Sensor, 450 IPS speed, Up to 16000 dpi Resolution

Specifications

Overview:

HyperX Pulsefire Haste - Gaming Mouse (Black)

- Ultra-light hex shell design
- Pixart 3335 sensor
- 16,000 DPI / 450 IPS / 40G
- Customizable with HyperX NGENUITY Software

Features:

The HyperX Pulsefire Haste is built for elite gamers looking to gain every fraction of a second possible in their quest to be the best. Weighing in at 59 grams, this full-featured, responsive honeycomb shell mouse has everything you need, just without the extra weight. TTC Golden micro switches provide satisfying, reliable clicks and are rated for 60 million clicks, so you won't have to worry about missing inputs. The flexible HyperFlex USB cable and the virgin-grade PTFE skates work together to give you a smooth, easy glide to make dominating the game simple.

Ultra-light hex shell design
Pulsefire Haste is built with a honeycomb shell that makes the mouse lighter than a solid shell mouse, without sacrificing durability. The open mesh design also allows for better ventilation and airflow.

HyperFlex USB Cable
The HyperFlex USB Cable is made from light, flexible paracord material designed to reduce tension and resistance for easier mouse movement.

TTC Golden micro dustproof switches
These switches provide solid, satisfying clicks so you'll know that they're being registered. They also feature an anti-dust coating, and are rated for up to 60 million clicks.

Pure virgin-grade PTFE skates
The low-friction 100% PTFE skates help provide an easy, effortless glide to make the mouse more responsive. There's also a replacement set of skates included in case they wear out.

Grip tape included
For people who prefer a bit more control and comfort, grip tape is included for the side of the mouse and both left and right mouse buttons.

Customizable with HyperX NGENUITY Software
Easily customize DPI settings, RGB lighting, button assignments, and record macros with powerful, easy-to-use, HyperX NGENUITY Software.

Pixart 3335 sensor
The Pixart 3335 is a nice balance between weight and performance and can detect up to 16000 DPI natively. Get the fluid, responsive tracking you need to keep your aim on target.

Responsive split-button design
The split-button design gives the entire button consistent feel wherever you click, and helps the mouse detect both light clicks and robust ones.

Specifications:

Color	Black
Buttons	6
DPI Presets	400 / 800 / 1600 / 3200 DPI
