Specifications

Features:

Unmatched Performance
We took a look at the landscape of high-performance mice and felt we could do a better job. So we did. The SteelSeries Rival's performance reigns over the competition thanks to a cutting edge sensor, newly developed switches engineered by SteelSeries, and a suite of tweaks to give you the edge over your rivals.

Advanced Optical Sensor
At the heart of Rival is the Pixart PMW3310 optical sensor. The 3310 promises zero hardware acceleration, offering true 1:1 tracking and precise movements no matter how fast things get during the heat of battle. The CPI is best-in-class with adjustments from 50 to 6500.

SteelSeries Switches

Our proprietary SteelSeries engineered switches have a lifetime of over 30 million clicks and are the high-speed conduit between the sensor and mouse clicks. The audible mouse click is subtle, while delivering quick, tactile responsiveness.

Fine Tuning
When it's time to get competitive you can really dial-in your settings thanks to SteelSeries Engine 3. Adjustable CPI, programmable buttons, polling rate, angle snapping, acceleration and deceleration are among the customizations that will make the mouse perform as you see fit.

Unrivaled Design
It has been many years since we last built a right-handed mouse so we feel Rival is long overdue. We went back to the drawing board and built off classic gamer favorites to make this mouse the ultimate solution in ergonomic feel.

New Shape
Rival's shape was molded from some of the most iconic gaming mice of the past. We took great lengths to ensure a comfortable fit thanks to the right-handed orientation, a raised back end, and sleek contours.

Surface & grips
Our soft-touch paint is a unique experience, offering a matte finish while still feeling incredibly smooth. The anti-sweat coating helps to maintain great contact even during intense gaming sessions. The rubber grips are not a sticker, but direct injected molded rubber for better control and grip.

Ergonomic Buttons
No one wants to do finger gymnastics just to press a button on their mouse. We engineered Rival with ergonomic button position and size so clicks and movements feel natural, quick and don't take away from gameplay.

Endless Customization
Rival is incredibly customizable with 16.8 million color, 2-zone illumination, a 3D printable nameplate for individuality, and SteelSeries Engine 3 for finely-tuned performance adjustments.

Brilliant Illumination
Rival features two independent lighting zones that are capable of 16.8 million colors. Colors can be adjusted in each zone, per specific profile, game or application. Four brightness levels and three lighting effects to choose from-Steady, ColorShift and Breathe-will help make Rival your own.

SteelSeries Engine 3
Our new software suite is where you take control of the mouse and its many features. This new version of SteelSeries Engine gives users a unified application to control all of their SteelSeries products, offers cross platform support, and will feature a cloud syncing system to make sure you always have your Rival settings.

3D Printable Nameplate
You may notice that your Rival came with 2 interchangeable nameplates. To switch them out, simply pry the existing one off at either end (a fingernail or the tip of a pen can do the trick) and pop the other one in. If you are handy with a 3D printer, you could even make your own nameplate - more details on how to create your own coming soon.

Optical Sensor

- 50 to 6500 Adjustable CPI
- 1ms Response Rate / 1000Hz Polling Rate
- 200 Inches Per Second (IPS)
- 50Gs of Acceleration

Properties

- 6 Programmable Buttons

- 16.8M Color Illumination w. 2 Zones
- Soft-touch coating
- Injected rubber side grips
- Cable Texture: Soft Rubber Cable

SteelSeries Switches

- > 30 Million Click Durability
