

65285

Goobay 3.5mm Jack to RCA Audio Adapter 1m Cable

Product Overview

Goobay 3.5mm Jack to RCA Audio Adapter 1m Cable; left and right audio; gold-plated contacts; aluminium connector housings; copper conductors; braided textile sheath; aluminium foil shielding

Specifications

About this product

The Goobay 3.5mm Jack to RCA Audio Adapter Cable 1m (65285) connects devices with a 3.5mm stereo audio output to equipment with left and right RCA audio inputs. Featuring a 3.5mm male stereo jack, 2 x RCA male connectors, gold-plated contacts and a flexible braided textile cable, it is ideal for connecting compatible smartphones, laptops, PCs and other audio sources to amplifiers, stereo systems, speakers and home cinema equipment. Buy this Goobay audio adapter cable online for convenient stereo audio connectivity in South Africa.

Overview Summary

Goobay 65285 3.5mm Jack to RCA Audio Adapter Cable - 1m

The Goobay 65285 is a stereo audio connection cable designed to link a device with a standard 3.5mm headphone or audio output to equipment with two RCA audio inputs. Its 3.5mm male connector carries stereo audio to the two RCA plugs, which handle the left and right audio channels for compatible sound systems and amplifiers.

The 1m cable features gold-plated connector contacts, slim metal plug housings, a flexible braided textile sheath and bend protection. Red and white RCA plugs help identify the left and right audio channels, making installation straightforward for compatible home audio, desktop and entertainment setups.

Performance tier:Everyday stereo audio connectivity

Uses:Connecting laptops to amplifiers, connecting compatible smartphones to RCA audio systems, PC audio output, home stereo systems, home cinema equipment, compatible speakers and soundbars with RCA audio inputs

Overview

The Goobay Plus series comes in a slim, elegant metal design in Sharkskin Grey. The RCA cable is your simple solution for transmitting crystal-clear sound from smartphones, laptops or home cinema systems - for easily enjoying film and music in superior quality.

Description

The Goobay 3.5mm Jack to RCA Audio Adapter Cable is a practical solution for connecting audio devices with a 3.5mm stereo output to compatible equipment with left and right RCA inputs. With a 1m cable length, it is suitable for many desktop audio arrangements, entertainment systems and home stereo installations where a short connection is required.

One end features a 3.5mm male stereo jack, while the other end provides 2 x RCA male plugs for the left and right audio channels. This arrangement allows compatible audio sources, such as laptops, PCs and smartphones with a suitable headphone output, to connect to amplifiers, receivers and other equipment with analogue RCA audio inputs.

The Goobay Plus cable combines a flexible braided textile exterior with slim metal connectors and bend protection. Gold-plated contacts help resist corrosion, while the red and white RCA colour coding makes it easier to identify the stereo channels during setup. The cable is designed for analogue stereo audio connections and does not convert digital audio signals.

For best compatibility, check that the source device has a 3.5mm analogue stereo audio output and that the receiving equipment has a pair of RCA audio inputs. Buy the Goobay 65285 for a convenient connection between compatible audio devices and traditional stereo equipment.

Features

The Goobay 65285 provides a simple way to connect compatible devices with a 3.5mm audio output to stereo equipment with RCA inputs.

ComX Computers

Product Specification Sheet

- 3.5mm stereo jack to 2 x RCA: Connects a compatible analogue stereo audio source to left and right RCA audio inputs.
- 1m cable length: Suitable for short audio connections in desktop and home entertainment setups.
- Gold-plated contacts: Help resist corrosion and support reliable electrical contact.
- Flexible textile sheath: Provides a braided exterior designed for practical everyday handling.
- Bend protection: Helps protect the cable near the connectors during normal use.
- Red and white RCA plugs: Make it easier to identify the left and right stereo audio channels.
- Slim metal connector housings: Provide a compact connector design for compatible audio sockets.
- Copper inner conductors: Provide the cable's internal audio signal path.
- Shielded construction: Aluminium foil shielding helps reduce unwanted electrical interference.
- Broad audio applications: Suitable for compatible laptops, PCs, smartphones, amplifiers, stereo systems and home cinema equipment.

What's in the Box

- 1 x Goobay 65285 3.5mm Jack to RCA Audio Adapter Cable, 1m

Specifications

- Brand: Goobay
- Product code: 65285
- Product type: Stereo audio adapter cable
- Cable length: 1m
- Connector 1: 3.5mm male jack, 3-pin stereo
- Connector 2: 2 x RCA male plugs
- RCA channel assignment: Left and right audio
- Contact plating: Gold-plated
- Connector housing material: Aluminium
- Inner conductor material: Copper
- Cable construction: Round cable
- Cable sheath: Braided textile
- Cable outer diameter: Approximately 3.3mm
- Conductor size: 28 AWG
- Shielding: 1 x aluminium foil shielding
- Cable colour: Black and silver
- Bend protection: Yes
- Intended signal: Analogue stereo audio
- Packaging: Retail polybag
- EAN: 4040849652851

FAQ

What is the Goobay 65285 3.5mm to RCA cable used for?

It connects a compatible device with a 3.5mm stereo audio output to an amplifier, receiver or sound system with two RCA audio inputs.

Can I connect a laptop to an amplifier with this cable?

Yes. You can connect a laptop with a 3.5mm analogue audio output to an amplifier with left and right RCA inputs.

Can I use this cable with a smartphone?

ComX Computers

Product Specification Sheet

Yes, if the smartphone provides a compatible 3.5mm analogue audio output. Phones without a headphone socket may require a separate compatible audio adapter.

Which RCA plug is left and which is right?

The red and white colour coding helps identify the two stereo channels. Match each plug to the corresponding colour-coded input on the receiving equipment.

Does this cable support stereo sound?

Yes. The 3.5mm 3-pin stereo connector carries audio to the two RCA plugs for left and right channel playback on compatible equipment.

Can this cable connect to any RCA port on a TV?

It is intended for analogue RCA audio inputs on compatible equipment. Check the TV's connections before use, as some RCA sockets are outputs rather than inputs, and some televisions do not include analogue audio inputs.

Does the Goobay 65285 convert digital audio to analogue?

No. This is a passive audio cable, not a digital-to-analogue converter. The source device must provide an analogue audio signal through its 3.5mm output.

How long is the Goobay 65285 audio cable?

The cable is 1m long, making it suitable for short connections between nearby audio devices.

What are the benefits of gold-plated contacts?

Gold-plated contacts help resist corrosion and support reliable electrical contact when the connectors are used with compatible sockets.
