Lexmark Colour (CMY) Return Programme Developer Kit and Photoconductors Pack

Product Overview

Lexmark Colour (CMY) Return Programme Developer Kit and Photoconductors Pack, Yield: 175000 pgs

Specifications

Features:

Lexmark Return Programme
Lexmark Return Programme Developer Units are patented devices that are sold at a special price subject to the restriction that the developer unit may be used only once. Following the initial use, the customer agrees to return the developer unit only to Lexmark for remanufacture and/or recycling. The Return Programme developer units are designed to stop working once they reach their respective rated life (as established by Lexmark). In addition, the developer units are designed to automatically update the memory in your printer to protect against the introduction of counterfeit and/or unauthorised third-party cartridges. If the customer does not accept these terms, replacement developer units sold without these terms are available through www.lexmark.com.

Best Together
Genuine Lexmark supplies are engineered to work Best Together with your Lexmark printer, delivering excellent print quality from the first page to the last.

Value
Take a giant leap in longevity. Standout performance and maximum yield for a true investment in efficiency - and your professional future.

Developer and Photoconductor
The Developer and Photoconductor are designed to work best with UnisonTMtoner. Essential to Lexmark print system performance, UnisonTMToner's unique formulation consistently delivers outstanding image quality, ensures long-life print system reliability and promotes superior sustainability -- all in an innovative shake-free print system.
