Arctic MX-2 4g Thermal Compound

Product Overview

Arctic MX-2 4g Thermal Compound

Specifications

Overview:

ARCTIC MX-2 is the thermal compound offering high thermal conductivity and low thermal resistance to dissipate heat efficiently from CPU / GPU to the installed heatsink.

Features:

Excellent Performance
The ARCTIC MX-2 compound is composed of carbon micro-particles which lead to an extremely high thermal conductivity. It guarantees that heat from the CPU or GPU can be dissipated quickly and efficiently. With its performance, the ARCTIC MX-2 outperforms other well-known thermal compounds in the market.

Safe and Easy Application
As the ARCTIC MX-2 does not contain any metallic particles so electrical conductivity will not be an issue. Unlike other silver and copper compounds, the ARCTIC MX-2 ensures that contact with any electrical pins would not result in any sort of

damage. Moreover the ARCTIC MX-2 is very easy to apply as it has ideal consistency.

High Durability
In contrast to metal and silicon thermal compound, the ARCTIC MX-2 does not show decreasing performance over time. It does not need to be re-applied and has a durability of at least eight years.

Specifications	
Product Code	872767002081
Thermal Conductivity W/(mK)	5.6
Viscosity (poise)	850
Density (g/cm³)	3.96
UPC	0872767002081
Packaging Dimensions (L x W x H)	160 L x 110 W x 20 H mm
Net Weight	4g
itemnumber UPC	OR-MX2-AC-01
Gross Weight	0.13 kg
