Product Overview

Manhattan Electric Voltage Tester, Retail Box

Specifications

Overview:

The Manhattan Non-Contact Electric Voltage Tester tests for the presence of live AC Voltage from 50-600 Volts. Visual (flashing) and audible (beeping) indicators signal the presence of voltage by simply pressing the built-in pocket clip. The tester also features a built-in "safe test" feature that assures the batteries are operating properly. With its compact design--easily fitting in a shirt or pants pocket--the tester is perfect for checking to see if voltage is present or to verify if power is turned off before working on a circuit. The tester comes with batteries
