Asus P304 Tuf Gaming M5 Mouse

Product Overview

Asus P304 Tuf Gaming M5 Mouse

Specifications

Overview:

TUF Gaming M5 is a compact ambidextrous gaming mouse that delivers the comfort, performance, and reliability that gamers demand. It's ergonomic and lightweight for prolonged campaigns, with a high-precision optical sensor that gives you an edge in battle. Backed by 50-million-click Omron® switches and a specialized coating for exceptional durability, the M5 is validated for tough duty. It also features customizable ASUS Aura Sync RGB lighting so you can dominate in personalized style.

Features:

Ambidextrous Ergonomic Design
TUF Gaming M5 has a compact, ambidextrous form factor that's optimized for swift gameplay using claw or fingertip grip. Ergonomic and lightweight, it's comfortable for round after round of play. And its textured camo grips on both sides ensure enhanced handling and control.

Gaming-Grade Optical Sensor
Fitted with a gaming-grade 100- to 6,200-dpi optical sensor and tracking up to 220 inches per second (IPS), TUF Gaming M5 delivers the accuracy, precision and speed you need to compete. And with a 1,000Hz polling rate, you'll enjoy lag-free responsiveness for ultrasmooth gaming experiences.

Rugged and Tough
Inside and out, TUF Gaming M5 is built to provide years of service on the frontline. The outer shell features a specialized coating that's fortified to withstand a battery of more than 10 stringent abrasion, friction, and perspiration tests. And to help keep the K/D ratio high during frantic battle, critical buttons utilize tactile Omron switches that are rated for at least 50-million clicks, while the base features enhanced Teflon feet to keep movement smooth for countless hours.

Aura Sync RGB Lighting
Aura Sync gives you the freedom to personalize your TUF Gaming M5 using the entire color spectrum and various lighting effects. The illumination is easily synchronized with the extensive Aura Sync ecosystem, so it's a breeze to create a truly unique gaming den that really shines.

Six Tactile & Programmable Buttons

TUF Gaming M5 features six tactile and programmable buttons to configure your layout for personalized play. The separated design of the left and right buttons lowers actuation force and travel distance, so you'll enjoy faster and more tactile clicks. A DPI switch and indicator lets you adjust sensitivity on the fly, while two strategically placed left-side buttons and a clickable scroll wheel offer additional control options.

Onboard Memory

With onboard memory, TUF Gaming M5 lets you take up to three custom profiles on the road and have your settings available no matter where you go. A quick hardware shortcut is all that's needed to switch profiles for different games.

Armoury II

Armoury II is driver-based software that offers extensive controls and an intuitive UI so you can easily tune the TUF Gaming M5 and play your way. Create profiles, customize colors and lighting effects, map buttons, adjust performance settings and more. You can even track hardware stats during gameplay for entertaining data analysis.
