Logitech G300 USB Gaming Mouse

## Product Overview

Logitech G300 USB Gaming Mouse, Nine Programmable Controls, Onboard Memory Profile, Gaming Grade Optical Sensor, 1MS Response, Durable Build, USB Interface.

## Specifications

**Overview:**

More power. More control. More loot. More power. Nine programmable controls let you move keyboard commands to buttons that are in easy reach.

**Features:**

**Control standing by**
Nine programmable controls and three onboard profiles mean you can do more, more quickly.

**Comfort is king**
With a sculpted ambidextrous shape and easy-to-find controls, you can play comfortably and maneuver effortlessly for as long as you want.

**Crafted for gaming**
Durable buttons, a 2500 dpi optical sensor and a fast report rate keep you in command and in the game.

**Nine programmable controls**
Move keyboard commands to buttons that are in easy reach. You can stop clicking on-screen buttons and have the mouse work for you.

**Onboard memory profiles**
You can program up to three profiles for individual players or games (keyboard macros and dpi settings), so you can play your way on other PCs.

**User-configurable lighting**
Assign one of seven colors to each profile, so you can easily see which profile you're using.

**Easy-to-use configuration software**
Drag and drop commands to where you want them. Automatic game detection knows what game you're playing so you can have custom configurations for every game.

**Sculpted, ambidextrous shape**
Equally comfortable in either hand (and also great for people who don't want a large mouse.) Play longer before you call it quits.

**Gaming-grade optical sensor**
A 2500 dpi sensor accurately tracks slow or fast movements on a wide variety of surfaces. So you get consistent response to your hand movements.

**1 millisecond report rate**
Your mouse communicates over USB at a blazing-fast 1000 reports per second-as fast as USB can go, and eight times faster than standard USB mice.

**Durable build**
With buttons rated up to 10 million clicks, this durable mouse will play hard for a long time.
