Logitech G100s USB Corded Optical Gaming Mouse

Product Overview

Logitech G100s USB Corded Optical Gaming Mouse(N) - Gaming Mouse with 250 dpi - 2500 dpi Optical Gaming Mouse, EER2

Specifications

Overview:

G100s features exclusive Delta Zero sensor optimizations for high-accuracy cursor control. We applied advanced materials to each zone for improved comfort and durability.

Features:

Delta Zero sensor technology
Building on the powerful legacy of the G1 and G100 gaming mice, G100s features exclusive Delta Zero sensor optimizations for high-accuracy cursor control. Whether zipping across the screen or honing in on a single pixel, the 2500 DPI sensor responds accurately to your hand movements. The LED-illuminated sensor is designed to go beyond simple eye/hand coordination, diminishing the thinking required to move your character, adjust your sniper scope, select RTS units or direct MOBA skill shots.

Ultra-durable build
Gaming conditions torture typical mice. A typical League of Legends game player may make over 5,000 clicks per game. G100s is designed to endure. Upgraded primary mechanical microswitches are rated to a 20 million-click lifespan. Low-friction polytetrafluoroethylene feet are tested to last an amazing 250 km. Whatever you can dish out, G100s will stand up to it.

Advanced surface materials
We used infrared imaging to determine strategic tactile zones where the hand meets the mouse surface. We applied advanced materials to each zone for improved comfort and durability. To combat heat and moisture build-up, we added a durable hydrophobic coating to the palm area. For heavy contact zones, we added fingerprint-resistant coatings on the primary buttons.

Comfortable, ambidextrous shape
With a natural contoured grip designed for maximum comfort, you'll outlast the competition regardless of your hand size, grip style or handedness. The inverted trapezoid shape encourages a sure grip without a second thought.

In-game sensitivity switching
Make the right moves in any game situation. Shift through up to three DPI settings, from pixel-precise targeting (250 DPI) to lightning-fast maneuvers (up to 2500 DPI) with a single button press, conveniently located behind the scroll wheel.

2-millisecond report rate
Be confident your every command is executed as quickly as possible. Four times faster than a standard USB mouse, G100s captures your moves as fast as you can make them.

Lightweight design
G100s is light enough for quick, effortless movement with enough heft for precision placement and solid cursor control.

Slick feet
Low-friction polytetrafluoroethylene feet reduce drag for faster motions, smoother cursor movements and improved accuracy.

Easy-to-use setup software
Use the optional Logitech Gaming Software to perfectly match its commands to your favorite games. Simple drag-and-drop settings allow you to customize button and tracking profiles for any game you play. Or, use pre-configured customizations with automatic game detection.

System Requirements:

- Windows® 8, Windows 7, Windows Vista® or Windows XP
- USB port
- Internet connection for optional software download

Specifications	
Product Code	910-003538
Tracking	
Resolution	250 dpi - 2500 dpi
Max. acceleration	20 G
Max. speed	up to 120 inches (4.08 meters)/second
Responsiveness	
USB report rate	Up to 500 reports/second
Glide	
Dynamic coefficient of friction	.09 u (k)
Static coefficient of friction	.14 u (s)
Durability	
Buttons (Left/Right)	20 million clicks
Feet	250 kilometers
