Logitech G500S Black Laser Gaming Mouse

Product Overview

Logitech G500s Gaming Mouse - Laser, On-board Memory, Dual-Mode Scroll Wheel, Hyper Scrolling, USB

Specifications

Overview:

G500s features hyper-fast, dual-mode scrolling. You can adjust for feel and performance with up to 27 grams of extra weight. We applied advanced materials to each zone for improved comfort and durability.

Features:

Match your play style with ease
Everyone plays differently. Tune G500s to your unique playstyle. Change its overall weight. Adjust its center of gravity. Rearrange the placements of two different size weights; you can adjust for feel and performance with up to 27 grams of extra weight.

Precision and speed - without compromise
Unlike standard scroll wheels, G500s features hyper-fast, dual-mode scrolling. When gaming, quickly and accurately select menu options with click-to-click precision. Or, zip through Web pages with a quick flick of the free-spinning hyper-fast scroll wheel.

A difference you can feel
We used infrared imaging to determine strategic tactile zones where the hand meets the mouse surface. We applied advanced materials to each zone for improved comfort and durability. The hydrophobic coating on the palm area helps prevent your hand from sticking. For heavy contact zones, we added a fingerprint-resistant coating to the primary buttons. And, dry grip on the sides ensures a steady hand.

Be ready in an instant
Make the right moves in any game situation. Shift through multiple DPI settings for quickly selecting on-screen options or scanning the game map (up to 8200 DPI) or downshifting to make pixel-precise sniper targeting or unit selection (200 DPI) using dedicated buttons conveniently located next to the left primary button.

At your command
Achieve great results with the default configuration straight out of the box. Or, set up one-button triggers for actions that typically require digging into menus. Put push-to-talk communications in easier reach. Temporarily down-shift DPI. Reassign any game command or multi-command macro to any one of 10 programmable buttons with optional Logitech Gaming Software (LGS).

A mouse with a memory
Configure your mouse once and have it remember. Every game requires its own unique setup, be it World of Tanks or League of Legends. Program all 10 buttons across so you can bring your setup to other PCs.

Goes the distance, and then some
Gaming conditions torture typical mice. G500s is designed to endure. Upgraded primary mechanical microswitches are rated to a 20 million-click lifespan. Low-friction polytetrafluoroethylene feet are tested to last an amazing 250 km. Whatever you can dish out, G500s will stand up to it.

Rough and ready
With a cloth wrapped, durable 2 m (6.5 ft) USB cord, your mouse comes with a hook-and-loop cable to keep things tidy and ready to play.

Thought and action unite
Be confident your every command is executed as quickly as possible. Up to eight times faster than a standard USB mouse, G500s captures your moves as fast as you can make them.

Focus on accuracy
When the difference between MVP and also-ran is measured in pixels, laser sharp sensitivity pays off. G500s uses a gaming-grade laser that delivers precision at any hand speed and works across a wide range of surfaces to register even the

most subtle hand movements.

A material advantage
Low-friction polytetrafluoroethylene feet reduce drag for faster motions, smoother cursor movements, and improved accuracy.

Make it yours-simply
Use the optional Logitech Gaming Software to perfectly match its commands to your favorite games. Simple drag-and-drop settings allow you to customize button and tracking profiles for any game you play. Or, use pre-configured customizations with automatic game detection.

System Requirements:

- Windows® 8, Windows® 7, or Windows® Vista
- Available USB port
- Internet connection for optional software download
