Logitech G600 Black Gaming Mouse

## Product Overview

Logitech G600 MMO Gaming Mouse - 8200dpi Laser, 20 MMO Tuned G-Keys, On-The-Fly DPI Switching, G-Shift Button, Custom Backlighting, Onboard Memory, Hyperscroll

## Specifications

**Features:**

**20 MMO-tuned buttons**
Pre-configured for optimal MMO use right out of the box. G600 includes three primary buttons, 12 thumb buttons, a clickable scroll wheel that tilts and a G-switch to double down and dominate. Use optional Logitech Gaming Software for full programmability and customization.

**Dual-dish thumb panel**
Put immediate access to all 12 primary MMO skills under your thumb. The unique dual-dish design of the thumb panel was developed with direct input from both MMO gamers and leading MMO game developers. Field-testing led to two carefully positioned sets of six buttons, helping to reduce both learning time and action timings. And the actuation force is carefully tuned to minimize misclicks.

**G-shift button**
Use the G-Shift button to double the total number of customizable functions. In its default setting, holding the G-shift button down activates a second function to each G-key. Or set G-Shift to temporary change DPI for extra cursor precision.

**Custom-color backlighting**
Locate keys in any room with custom backlit keys. Choose 1 out of 16 million colors and assign a unique color to each profile, profile mode, and mode style in the same game. You can tell, without looking down, which mode you're in to ensure your setup is optimized.

**Custom-color lighting**
Customize the thumb panel lighting for a clear visual reference of up to 3 active profiles and 3 different sub modes. Choose 1 out of 16 million colors and assign a unique color to each profile, profile mode and mode style in the same game. Make colors pulse on-and-off or cycle continuously.

**Onboard memory profiles**
Program up to three profiles for individual players or games (keyboard macros and DPI settings), and bring your game to other PCs with no software required.

**On-the-fly dpi switching**
Quickly shift DPI levels, from pixel-precise targeting (200 DPI) to lightning-fast maneuvers (up to 8200 DPI), all with a single button press located behind the scroll wheel, or by reassigning the ring-finger button for temporary shifts in cursor speed while held down.

**Durable build**
Gaming conditions torture typical mice. All three primary buttons are rated to a 20 million-click lifespan. Low-friction polytetrafluoroethylene feet are tested to last an amazing 250 km. G600 is designed to endure.

**Naturally contoured grip**
With a natural contoured grip designed for maximum comfort and every button carefully positioned to reduce click fatigue while avoiding accidental actuations, you'll always be the last gamer standing.

**Gaming-grade laser**
When the difference between MVP and also-ran is measured in pixels, laser sharp sensitivity pays off. G600 uses a gaming-grade laser that delivers precision at any hand speed and works across a wide range of surfaces to register even the most subtle hand movements.

**Braided USB cable**

With a cloth wrapped, durable 2 m (6.5 ft) USB cord, your G600 mouse comes with a hook-and-loop cable to keep things tidy and ready to play.

**1-millisecond report rate**
Be confident your every command is executed as fast as possible. The 1000 Hz report rate is up to eight times faster than a standard USB mouse. G600 captures your moves as fast as you can make them.

**Low-friction feet**
The low-friction polytetrafluoroethylene feet eliminate friction on nearly any surface for smoother motions, precise cursor movements and improved accuracy.

**Easy-to-use setup software**
Use the optional Logitech Gaming Software to perfectly match its commands to your favorite games. Simple drag-and-drop settings allow you to customize button and tracking profiles for any game you play. Or, use pre-configured customizations with automatic game detection.

**System Requirements:**

- Windows® 8, Windows® 7, or Windows® Vista
- Available USB port
- Internet connection for optional software download
