Logitech G300S Optical Gaming Mouse

Product Overview

Logitech G300S Optical Gaming Mouse

Specifications

Features:

9 programmable controls
Achieve great results with the default configuration straight out of the box. Or, set up one-button triggers for actions that typically require digging into menus. Put push-to-talk communications in easier reach. Temporarily down-shift DPI. Reassign any game command or multi-command macro to any one of nine programmable buttons with optional Logitech Gaming Software (LGS).

Sculpted, ambidextrous shape
Versatile design in a compact shape, this mouse is built for comfort and durability.

User-configurable lighting
Assign a unique color and identity to each user profile with up to seven color variations to know what settings are active during game play.

Onboard memory profiles
Configure your mouse once and have it remember. Every game requires its own unique setup, be it World of Warcraft or Guild Wars 2. Program all nine buttons across so you can bring your setup to other PCs.

On-the-fly DPI switching
Make the right moves in any game situation. Shift through multiple DPI settings for quickly selecting on-screen options or scanning the game map (up to 2500 DPI) or downshifting to make pixel-precise sniper targeting or unit selection (250 DPI) using conveniently placed buttons.

1-millisecond report rate
Be confident that your every command is executed as fast as possible. Up to eight times faster than a standard USB mouse, G300 captures your moves as fast as you can make them.

Durable build

Engineer tests rated the primary buttons at 10 million clicks and the feet of travel at 250 km. Able to survive the most intense gaming sessions, G300 can go for as long as you can.

Slick feet
The low-friction polytetrafluoroethylene feet eliminate friction on nearly any surface for smoother motions, precise cursor movements and improved accuracy.

Easy-to-use configuration software
Use the optional Logitech Gaming Software to perfectly match commands to your favorite games. Simple drag-and-drop settings allow you to customize button and tracking profiles for any game you play. Or, use pre-configured customizations with automatic game detection.

System Requirements:

- Windows® 8, Windows® 7, or Windows Vista®
- Available USB port
- Internet connection for optional software download
