Product Overview

Logitech G102 LightSync RGB Mouse USB - White, LightSync RGB Lighting, 6 programmable buttons, 200 - 8000 dpi Resolution, 1000 Hz USB report rate

Specifications

Features:

READY TO PLAY

Make the most of your game time with G102 gaming mouse, featuring LIGHTSYNC technology, a gaming-grade sensor and a classic 6-button design. Light up your game … and your desk.

Make the most of your game time with G102 gaming mouse, featuring LIGHTSYNC technology, a gaming-grade sensor and a classic 6-button design. Light up your game … and your desk.

EASY CUSTOMIZATION

Pick one color, blend three, or make your own. The choice is yours! You can even sync your mouse with other Logitech G LIGHTSYNC gear.

DYNAMIC SCREEN SAMPLING

Set your lighting to Screen Sampler to make it synchronise with your screen. Set up your mouse to react to color shifts in games, movies, and more.

AUDIO VISUALIZER

Play music, movies, games-any sound, really-and G102 will flash colors to the beat. Customize levels and colors to make the dance party all your own.

GAMING-GRADE SENSOR

Get accurate cursor tracking and responsive performance thanks to a gaming-grade sensor. With adjustable sensitivity from 200-8,000 DPI, pick the right level that fits your play preference. Use Logitech G HUB software to program up to 5 presets.2Advanced features require Logitech G HUB software. Download free at LogitechG.com/downloads.

TRIED AND TRUE DESIGN

The classic six-button design provides both comfort and confidence so you can explore, cast spells, and play just like you want. Use Logitech G HUB software to assign in-game commands, system controls, or key binds to buttons and simplify your gameplay.

OPTIMIZED BUTTON TENSIONING

Primary left and right buttons have a Logitech G exclusive metal spring button tensioning system which delivers precise button actuation and consistent experience-click after click.

BUTTON ASSIGNMENTS

Assign system commands, shortcut keys, and keyboard commands to the 6 buttons. You can also create powerful macros, which let you input sequences of commands in a row that execute every time you click the assigned button.

SET YOUR SENSITIVITYS

G102 sensor is capable of sensitivity up to 8,000 DPI (dots per inch). G102 lets you choose sensitivity settings as easy as sliding a scroll bar. Set up to 5 levels and cycle through them with the press of a button. It's great for games that have different modes or levels that might require more control, like a sniper scope or a speed clicking level.

ONBOARD MEMORY

When you take your G102 with you, your custom settings can come along. By saving your preferences to the onboard memory using Logitech G HUB device settings you can use it on other computers with no need to install software or reconfigure your settings. Plug and play your way.
