Product Overview

Logitech Lift Vertical Ergonomic Mouse Wireless Mouse, Logi Bolt USB receiver, 1x AA Battery, 24-months Battery Life, SmartWheel Mouse Scrolling, Four buttons, 4000 dpi (Fully adjustable dpi), 910-006494

Specifications

Overview:

WHEN WORK IS DEMANDING, GIVE EVERYONE A LIFT

Lift for Business is designed for all-day comfort.

SCIENTIFIC APPROACH

The science of ergonomics is an integral part of our designers and engineers process of creating a new mouse. Ergo Series mice offer more natural postures, superior ergonomic benefits, and reduced movement or muscle strain and striking form factors.

MORE NATURAL POSTURE

Ergo products like Lift for Business place fingers and hands in a more natural posture, helping to relax the upper body. This leads to a quantifiable reduction in muscle activity, so work is more productive with less strain and forearm muscle fatigue.

INCREASED COMFORT

Reducing muscle strain and fatigue, while adding proper hand support, leads to a greater comfort, especially during long periods of work. Ergonomically-designed products help people focus on what matters.

ERGONOMICS IS ECONOMICS

Ergonomic equipment helps people work more comfortably, with higher efficiency and quality, with less downtime. It results in happier employees with lower absentee days. In short, ergonomics is good economics. Our Ergo Series can help your company become a healthier place to work.

Features:

COMFORT - PUTS HANDS AT THE OPTIMAL 57 degrees ANGLE

Ergonomists know that 57 degrees is the perfect hand angle. Elevating and placing the hand there, improves comfort and efficiency. And it improves employee experience and well-being, too.

FOR EVERYBODY - FITS ALL HANDS

Approved by ergonomists, Lift for Business is the right size for every hand- left or right- improving posture and reducing forearm muscle fatigue.

EFFICIENT - GOOD ERGONOMICS IS GOOD ECONOMICS

Ergonomic equipment helps people work more efficiently, comfortably and with less downtime. It increases focus and lessens forearm muscle fatigue.

ENTERPRISE SECURE - RELIABLE WIRELESS CONNECTIONS

Logi Bolt wireless technology conquers IT challenges for in-office and remote users. Cross-platform compatibility and secure, reliable connections- even in congested wireless environments.

- Places hands at an optimal 57 degree angle
- Comfort, now in left
- Approved by leading ergonomists
- Enterprise secure with Logi Bolt

FEATURES THAT DELIVER - SPEEDY SMARTWHEEL

With speed and precision scrolling, Lift for Business SmartWheel offers rapid scrolling through hundreds of pages and line-by-line precision. Switch modes easily with just a touch of the SmartWheel.

TWO WAYS TO CONNECT

Compatible with every major platform. Two connection options, Bluetooth and Logi Bolt, engineered for high-performance, secure connections. Compatible with just about every OS and platform making it an easy standard to deploy.

MADE WITH RECYCLED PLASTIC

The plastic parts in Lift for Business include post- consumer recycled plastic- 70% for graphite and 54% for off-white- to give a second life to end-of-life plastics and help reduce our carbonfootprint. Excludes plastic in receiver, battery, printed wiring assembly (PWA), FFC cable, and packaging.

USER TESTED, ERGO-CERTIFIED

Lift for Business has been designed, developed, tested and approved by leading ergonomists. It improves posture, reduces muscle activity, and alleviates wrist pressure. Lifts organic silhouette fits your palm like a glove - with a curved shape sculpted to place the hand at the optimal 57 degrees angle.

LOGI OPTIONS+

IT administrators can remotely deploy and manage Logi Bolt device firmware updates (DFU) and Logi Options+ en masse. This includes defining software settings centrally and pushing to Windows and macOS systems. Additionally, Logi Options+ has four customizable buttons for increased productivity.
