## Specifications

### About this product

The Logitech R400 Wireless Presenter (910-001356) in black is a practical presentation remote designed for business meetings, classroom teaching, training sessions and professional presentations. Featuring 2.4GHz wireless connectivity with a range of up to 15 metres, a visible red Class 2 laser pointer and intuitive slideshow controls, it lets you navigate slides, highlight key information and move freely while presenting. The plug-and-play USB receiver requires no software installation and stores inside the presenter for convenient transport. Buy the Logitech R400 Wireless Presenter online in South Africa for a reliable presentation control solution.

### Overview Summary

**Logitech R400 Wireless Presenter - Black**

The Logitech R400 is a wireless presentation remote designed to help presenters deliver clear, confident and well-organised presentations. Its intuitive buttons provide convenient control over slide navigation, while the built-in red laser pointer helps draw attention to important details in presentation content.

With 2.4GHz wireless technology and an operating range of up to 15 metres, the R400 gives presenters room to move around a meeting room, lecture hall or training space. The USB mini receiver offers plug-and-play connectivity, and the integrated receiver storage makes the remote easy to pack away after use. A battery and power indicator helps you monitor the device during presentations.

**Performance tier:**Professional presentation accessory

**Uses:**Business presentations, classroom teaching, corporate training, seminars, lectures, conference presentations, slideshow navigation, highlighting presentation content

### Overview

You'll be in control from the first slide to the last. Buttons are easy to find by touch. And the smooth contours feel great in your hand.

### Description

The Logitech R400 Wireless Presenter is designed for presenters who need straightforward, dependable control over their slides without remaining next to a computer. Its ergonomic black handheld design features easy-to-find buttons, allowing you to navigate presentation content while maintaining your focus on the audience.

The built-in red laser pointer helps you highlight charts, diagrams, text and other important details on compatible projection surfaces. Its 2.4GHz wireless connection provides an operating range of up to 15 metres, making it suitable for many meeting rooms, lecture spaces and training environments.

Dedicated presentation controls include previous and next slide buttons, a laser pointer button, F5/ESC functionality and a blank screen control. These functions help you start or exit a slideshow, move through content and temporarily hide the presentation when needed.

The included USB mini receiver connects to a compatible computer for plug-and-play operation without requiring software installation. When the presentation is finished, the receiver can be stored inside the presenter to reduce the risk of losing this small accessory. Powered by 2 AAA alkaline batteries, the Logitech R400 is a convenient choice for professionals, educators and students who regularly deliver presentations.

### Features

The Logitech R400 combines wireless slide control, a red laser pointer and a portable design to make presentations easier to

manage.

- Wireless freedom: 2.4GHz wireless technology provides a range of up to 15 metres, allowing movement around the presentation area.
- Red laser pointer: A Class 2 visible red laser helps highlight important information on compatible projection surfaces.
- Intuitive slideshow controls: Dedicated previous and next buttons make it easy to move through presentation slides.
- F5/ESC control: Convenient access to slideshow start and exit functions on compatible systems.
- Blank screen control: Temporarily hide presentation content when required.
- Plug-and-play USB receiver: Connect the included receiver to a compatible USB port without installing additional presentation software.
- Integrated receiver storage: Store the wireless receiver inside the presenter when it is not in use.
- Battery and power indicators: Indicator lights help show battery and device status.
- Portable design: The compact handheld remote is easy to carry between meetings, classrooms and training venues.
- Replaceable batteries: Uses 2 AAA alkaline batteries, which can be replaced when depleted.

**Keep your audience in the palm of your hand**
Buttons are easy to find by touch. And the smooth contours feel great in your hand. You'll be in control from the first slide to the last.

**Red laser pointer**
It'll be easy for your audience to see exactly what you're pointing to. If you present on TV & LCD screens2Class 2 laser product tested to limit the power of emission to 1mW continuous wave. Laser light is reflected on LCD and plasma screens, making it less visible. and need a digital pointer, try the SPOTLIGHT PRESENTATION REMOTE

**Move freely**
Up to 15 meters3Wireless range may vary based on user, environmental and computing conditions. range and battery indicator help you make ordinary presentations extraordinary.

**Plug-and-play wireless receiver**
There's no software to install. Just plug the receiver into a USB port to begin. And when the show is over, you can store the receiver in the presentation remote.

## FAQ

### What is the Logitech R400 Wireless Presenter used for?

The Logitech R400 is used to control presentation slides wirelessly and highlight important information with its built-in red laser pointer. It is suitable for business meetings, classroom lessons, seminars and training sessions.

### What is the wireless range of the Logitech R400?

The Logitech R400 has a wireless operating range of up to 15 metres, allowing presenters to move around the room while controlling their slides.

### Does the Logitech R400 require software installation?

No. The included USB mini receiver supports plug-and-play operation on compatible computers, so additional presentation software is not required for basic remote functionality.

### Which batteries does the Logitech R400 use?

The Logitech R400 uses 2 AAA alkaline batteries. The batteries are replaceable and are included in the package.

### Is the Logitech R400 compatible with Windows 10 and Windows 11?

Logitech lists Windows 10 and Windows 11 or later in its support specifications. A compatible USB port is required. Check your computer and presentation software compatibility before purchase.

## Can the Logitech R400 navigate PowerPoint slides?

Yes. Its dedicated previous and next buttons are designed for slideshow navigation, while the F5/ESC control supports starting and exiting a slideshow on compatible systems.

## Can the Logitech R400 laser pointer be used on any screen?

The red laser pointer is intended for compatible projection surfaces. Laser light can be difficult to see on some LCD and plasma screens, so a digital pointer may be more suitable for presentations displayed directly on those screens.

## Does the Logitech R400 have a rechargeable battery?

No. The Logitech R400 uses 2 non-rechargeable AAA alkaline batteries. Replace the batteries when they are depleted.

## Can the USB receiver be stored inside the Logitech R400?

Yes. The wireless mini receiver stores inside the presenter, helping keep the receiver together with the remote during transport and storage.
