Logitech MK710 Cordless Desktop

Product Overview

Logitech MK710 Cordless Desktop - Unifying, 3 years, Nano Unifying Receiver - up to 3 year battery life

Specifications

Overview:

Power-packed
The up to three-year battery life for both keyboard and mouse makes this combo so hassle-free you just might forget it uses batteries at all.

Dip into comfort
With Logitech Incurve keys and a cushioned palm rest, this low-profile keyboard almost feels like it's custom-made for you.

Small wonder
Logitech Unifying receiver-the tiny, wireless receiver that stays in your laptop and lets you add devices as you need them.

Features:

Logitech Incurve keys
Concave keys with softly-rounded edges position your fingers properly and invite your fingertips to glide from key to key-keeping you comfortable for hours.

Low profile, longer key travel
Not easily found on many low-profile and laptop keyboards, longer key travel improves comfort and your overall typing experience.

Cushioned palm rest
Your hands can relax-the cushioned palm rest feels so much better than hard plastic.

Sculpted mouse
It positions your hand and fingers comfortably and naturally.

Hyper-fast scrolling
You'll fly through long documents and Web pages with just a flick of the nearly frictionless scroll wheel.

LCD dashboard
It gives you at-a-glance icon status of your battery, Caps Lock, Scroll Lock and Num Lock, so you won't skip a beat while typing.

Logitech Unifying receiver
The tiny receiver stays in your laptop. Plus, you can easily add another compatible wireless mouse or keyboard-without the hassle of multiple USB receivers.

Logitech Advanced 2.4 GHz wireless connectivity
You can confidently work and play where you please. Encrypted, secure cordless technology ensures you a reliable connection with virtually no lags or dropouts.
