Logitech Logitech Pro X2 Rapid White Keyboard - USB

Product Overview

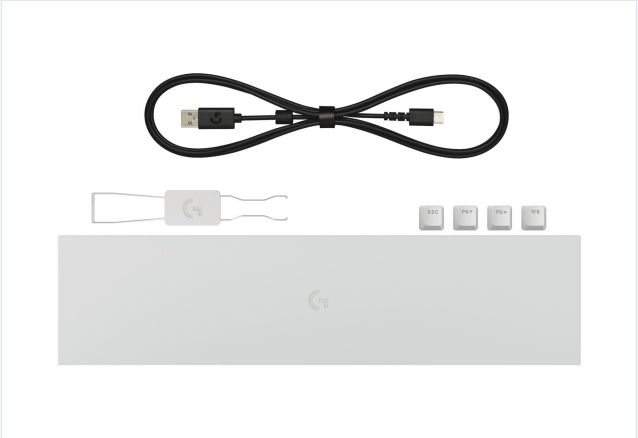

Logitech Logitech Pro X2 Rapid White Keyboard - USB, Tenkeyless Analog Gaming Keyboard with Hall-Effect sensors, 8 kHz Scan and USB polling rate for Rapid response, Adjustable actuation points ranging from 0.1mm to 4mm in 0.05mm increments, High Profile Analog Linear Switches, Rapid Trigger Technology for minute Input adjustments, Key priority (Socd) support for Expert strafing, Per-Key LightSync RGB key backlighting, Custom factory-lubed KS-20 POM Switches included, Swappable DoubleShot PBT KeyCaps with screw-in stabilizers, USB 2.0 Wired connection via USB Type-A to USB-C cable, Includes Silicone Palm rest and spare KeyCaps

Specifications

Overview Summary:

Dominate your gaming sessions with the Logitech PRO X2 RAPID White, an elite 8K wired TKL analog gaming keyboard engineered for South African esports enthusiasts who demand absolute precision. Featuring revolutionary Rapid Trigger technology and Hall Effect sensors, this keyboard delivers instant reset speeds and fully customizable actuation points to give you a decisive edge in every match.

Designed with premium magnetic analog switches and a durable build, the PRO X2 RAPID ensures every movement is translated instantly without delay. The sleek white finish combined with per-key LIGHTSYNC RGB lighting makes it a standout addition to any setup while maintaining professional performance standards.

Elevate your gameplay today by buying now on our store and secure this ultimate performance machine for your competitive advantage.

Performance tier: Pro Esports

Uses: Competitive FPS gaming, MOBA strategy games, high-speed typing, professional esports tournaments, custom key mapping

Overview:

The Logitech PRO X2 RAPID is engineered as the ultimate performance machine for competitive gamers who demand every possible advantage. This wired tenkeyless analog gaming keyboard combines rapid trigger technology with an industry-leading 8 kHz scan and USB polling rate, ensuring that your inputs are registered instantly. Designed for precision, it offers fully adjustable actuation points ranging from 0.1mm to 4mm in 0.05mm increments, allowing you to tailor the key response to your specific playstyle. The inclusion of KEY PRIORITY (SOCD) technology provides expert-level support for complex strafing movements, while the premium build quality and customization options prepare you for any challenge on the server.

Description:

The PRO X2 RAPID in White (Part Number: 920-014097) redefines competitive gaming with its magnetic analog switches and rapid trigger system. This keyboard delivers an unparalleled speed advantage through its 8 kHz polling rate, enabling millisecond-level reaction times that standard keyboards cannot match. The customizable actuation points allow for precise control over every keystroke, while the included OLED display offers real-time game stats and settings monitoring at a glance. Built with high-profile analog linear switches, swappable doubleshot PBT keycaps, and exclusive screw-in stabilizers, this

device ensures a consistent and premium feel that can be fine-tuned to perfection.

Features:

The Keys to Performance
Take full control of your gameplay with technology designed for the pros. The rapid trigger system adjusts the return distance required for a key to reset before it registers again, giving you an edge in extremely minute and rapid movement inputs. Combined with Key Priority (SOCD) for expert strafing, this keyboard ensures that every command is executed without delay. The 100% magnetic analog switches paired with six-layer dampening provide a responsive and satisfying tactile experience, making the PRO X2 RAPID feel like a true performance machine in your hands.

Rapid Trigger Technology
The rapid trigger feature allows you to adjust the exact return distance needed for a key to reset before it can be pressed again. This capability is essential for pro players who rely on extremely minute, rapid movement inputs to outmaneuver opponents. By reducing the travel distance required to register a new input, you gain the ability to react first in high-stakes scenarios where fractions of a second determine victory.

Precision with Enhanced Keys
Experience expanded actuation point options from 0.1mm to 4mm in precise 0.05mm increments for every key using custom, factory-lubed KS-20 POM switches. The keyboard supports swappable Doubleshot PBT keycaps and exclusive screw-in stabilizers, giving you the freedom to fine-tune the key feel with confidence. This level of customization ensures that your typing and gaming experience is perfectly aligned with your personal preferences.

Key Specifications

- Keyboard Type: TKL (Tenkeyless)
- Sensor Technology: Hall-Effect Magnetic Analog Switches
- Polling Rate: 8 kHz for ultra-low latency
- Backlighting: Per Key LIGHTSYNC RGB
- Programmable Keys: 100% programmable with KEYCONTROL support
- Connection Type: Wired USB 2.0
- Switch Actuation Distance: Customizable in 0.05mm increments (0.1mm to 4mm)
- Switch Force: 30g +/-10g
- Total Travel Distance: 4mm +/-0.2mm

Dimensions and Build
The PRO X2 RAPID boasts a compact and robust design with precise dimensions to fit any setup. The keyboard stands at a height of 38 mm, spans a width of 363 mm, and has a depth of 143 mm. It includes two indicator lights for status updates and features one built-in USB port for added convenience. System requirements include internet access for Logitech G HUB software configuration and a host device with a USB 2.0 port, ensuring compatibility with Windows 10 or later and macOS 12 or later.
