Logitech Flight Rudder Pedals - simulation rudder pedals + toe brake

Product Overview

Logitech Flight Rudder Pedals - simulation rudder pedals + toe brake, USB connection Type, 945-000005

Specifications

About this product

The **Logitech G Saitek Pro Flight Rudder Pedals** are professional simulation rudder pedals with integrated toe brakes and a USB connection for precise aircraft control in flight simulators. These self-centering pedals with adjustable damping deliver smooth, accurate rudder and brake input for realistic flight experiences. Buy now from our site for enhanced control and flight simulator immersion in South Africa.

Overview Summary

The **Logitech G Saitek Pro Flight Rudder Pedals** (model 945-000005) bring professional-grade rudder and toe brake control to your flight simulator setup. Designed for serious simulation enthusiasts, these pedals offer fluid motion with adjustable tension that lets you fine-tune resistance to suit your flying style. They connect via USB for plug-and-play use with compatible PC flight sims and complement other Logitech G flight controls like yokes and throttles.

The ergonomic foot rests feature non-slip materials and adjust to fit a range of foot sizes, while differential toe brakes give independent left-right braking precision. Built to expand your virtual cockpit, these pedals enhance your ability to taxi, turn, and

land with the realism and responsiveness expected from advanced simulation hardware. Experience refined control and improved flight accuracy with every session.

Performance tier:Mid-range flight simulation hardware

Uses:Flight simulation, rudder control, toe brake control, PC gaming

Overview:

Experience unmatched control and realism with the Logitech Flight Rudder Pedals. Designed for flight enthusiasts and simulation pilots, these pedals offer precise control over aircraft rudders and toe brakes, providing a truly immersive flight experience. With adjustable tension and self-centering pedals, every maneuver feels smooth and responsive. Perfectly compatible with the Logitech G Flight Yoke System, these pedals bring professional-grade control to your home cockpit.

Description

The **Logitech G Saitek Pro Flight Rudder Pedals** 945-000005 are engineered to elevate your flight simulation experience with realistic rudder and braking control. These pedals use a smooth, self-centering mechanism with adjustable damping so you can tailor resistance and responsiveness to match your flying style. The integrated toe brakes provide differential control for left and right brakes, giving you precise handling during ground operations like taxiing and landing. Their ergonomic foot rests are designed to fit a wide range of foot sizes and include non-slip materials to keep your feet secure during intense flight sessions.

Connection to your PC is straightforward with a USB interface that supports plug-and-play compatibility with popular flight simulation software. The robust construction ensures lasting performance, while modular design allows the pedals to integrate with other Logitech G flight hardware. Whether you are flying a light aircraft or a multi-engine airliner, these pedals add another dimension of realism and control to your virtual cockpit.

Features

- USB connection: Simple plug-and-play USB setup for PC flight simulators.
- Adjustable tension: Customise pedal resistance with an easy dial for more personalised control.
- Self-centering design: Smooth movement and return to centre for intuitive control.
- Differential toe brakes: Independent left and right brake control for accurate taxi and landings.
- Ergonomic pedal design: Adjustable foot rests with non-slip surface for comfort and stability.

Realistic Flight Control with Smooth Pedal Motion

Elevate your simulation setup with pedals that replicate the feel of a real aircraft. The fluid, self-centering motion ensures accurate rudder input, while independent toe brakes allow differential braking. Every movement translates seamlessly to your virtual aircraft, enhancing control and precision during flight.

Optimized for Microsoft Flight Simulator

Fly with confidence using hardware designed for the next generation of flight simulation. Explore over 37,000 airports, 2 million cities, and 1.5 billion buildings, with lifelike terrain, dynamic weather, and realistic traffic. These pedals plug directly into your system without the need for additional software or drivers, making them ready for immediate use.

Customizable Resistance for Personal Control

Adjust the tension dial to match your preferred flying style. Whether you like light, responsive movement or firmer, more resistant pedals, fine-tune your setup for maximum comfort and precision.

Modular Design for a Complete Flight Setup

Easily combine these pedals with other Logitech G flight accessories to create a fully customized cockpit. Position instrument panels in any configuration with the included mounting brackets, giving you flexibility and control over your simulation environment.

Enhanced Stability and Comfort

Adjustable footrests accommodate a variety of foot sizes, while non-slip materials keep the pedals securely in place. This design ensures comfortable, uninterrupted flying even during extended sessions.

What's in the Box

- Flight rudder pedals unit
- Heel rest extensions
- User documentation

Specifications	
Product Code	945-000005
DIMENSIONS	
RUDDER PEDALS (NOT INCLUDING HEEL RESTS)	Length: 31 cm
	Width: 40.3 cm
	Height: 16.8 cm
	Weight (w/o heel rests): 2350 g
	Cable length: 1.8 m
TECHNICAL SPECIFICATIONS	
CONTROLLER SPECIFICATIONS	Connection Type: USB
	USB Protocol: USB 2.0
	USB Speed: Full Speed
	Indicator Lights (LED): Yes
	LCD Display: No
	USB Ports (Built-in): No
	Backlighting: No
PART NUMBER	945-000005
SYSTEM REQUIREMENTS	Smart Technology
	Windows 10 Windows 8.1, Windows 7
	1-USB 2.0 Port
	Internet connection for optional software download
IN THE BOX	Flight Rudder Pedals
	Heel rest extensions
	User documentation

FAQ

What platforms are these rudder pedals compatible with?

These pedals are designed for PC flight simulators and use a USB connection. They are compatible with Windows operating systems such as Windows 7, 8.1, and 10, and plug directly into a USB 2.0 port for control input.

Can I adjust the feel of the pedals?

Yes, the adjustable tension dial lets you fine-tune resistance to suit your personal flying preferences and ensures smooth, responsive control.

Do these pedals work with all flight simulator games?

These rudder pedals connect via standard USB and should work with most PC flight simulation software that supports joystick or game controller input. Specific game compatibility can vary, so checking game control settings may help ensure proper mapping.

Are the pedals easy to set up?

Yes, the rudder pedals are plug-and-play with USB connection and do not require additional drivers for basic functionality, making setup quick and straightforward.
