Specifications

Overview Summary:

Enhance your online communication with the Logitech HD Webcam C270, designed specifically for South African professionals seeking reliable video quality. This plug-and-play USB camera delivers crisp 720p HD video at 30fps, ensuring you look clear and professional during every Zoom or Skype call. Whether you are working from home or attending online classes, the RightLight technology automatically adjusts to your lighting conditions while the built-in microphone filters out background noise for crystal-clear audio.

Don't compromise on clarity; get the perfect setup for your digital meetings today. Secure yours now and experience seamless video conferencing with a device trusted by users worldwide. Buy now to upgrade your remote work or study environment immediately.

Performance tier:Standard Entry-Level

Uses: Video Conferencing, Online Learning, Remote Work, Webinars, Personal Streaming

Overview:

The Logitech HD Webcam C270 is designed to bring professional quality video communication to your home office or study space. With a resolution of 720p at 30 frames per second, this webcam ensures that your video calls are smooth and visually sharp. The device features automatic light correction technology known as RightLight 2, which adjusts brightness and contrast in real-time so you look natural even in low-light environments. A built-in mono microphone with noise reduction capabilities captures your voice clearly from up to one meter away, filtering out background distractions during important meetings or online classes.

This versatile camera comes with a universal mounting clip that securely attaches to laptops, monitors, or LCD screens, though it can also be folded down for tabletop use. The compact and lightweight build makes it easy to transport between different workspaces. Connectivity is seamless thanks to the included 1.5-meter USB-A cable, allowing for flexible placement without worrying about short cords. It supports a wide range of operating systems including Windows, macOS, and Chrome OS, making it a reliable plug-and-play solution for virtually any computer setup.

Description:

The Logitech HD Webcam C270 offers an excellent balance of affordability and performance, featuring crisp 720p video at 30fps with automatic light correction to ensure you always look your best. The mono built-in microphone utilizes noise-reducing technology to isolate your voice up to one meter away, while the fixed-focus plastic lens maintains clarity across a comfortable 55-degree field of view. Designed for effortless setup, the universal clip fits securely on most screens or can be used flat on a desk, and the 1.5-meter USB-A cable ensures reliable connectivity with Windows, macOS, and Chrome OS devices.

Features:

HD Video Performance

Experience clear and stable video streaming ideal for remote work, virtual meetings, and online learning. The camera delivers a smooth 720p resolution at 30fps, ensuring fluid motion without stuttering. RightLight 2 technology automatically adjusts to changing lighting conditions, balancing exposure so you do not appear washed out or too dark. The fixed-focus plastic lens is optimized for face-to-face interaction with a diagonal field of view that captures you and your immediate surroundings naturally.

Audio Clarity

The integrated mono microphone is tuned to pick up speech clearly while minimizing background noise. This ensures that your voice remains distinct even if you are in a busy household or a crowded room, making it perfect for conference calls where clear communication is essential. The microphone range extends effectively up to one meter from the camera.

Easy Installation and Mounting

Simplicity is at the core of this device, featuring a universal clip that attaches securely to laptop screens or monitors. If you prefer not to mount it on your screen, the clip can fold down so the webcam sits flat on your desk. The setup requires no drivers for most systems and works instantly with popular platforms like Skype and Zoom.
