About this product

The Logitech C920s Pro HD Webcam (960-001252) delivers Full HD 1080p video at 30fps for professional video calls, online meetings, remote work, live streaming and content creation. Featuring a five-element glass lens, smooth autofocus, automatic HD light correction and dual stereo microphones, this USB webcam captures clear images and natural sound in a range of lighting conditions. The built-in privacy shutter provides added control when the camera is not in use, while the universal mounting clip supports convenient setup on laptops and monitors. Buy the Logitech C920s Pro HD Webcam online for clear communication and professional video quality in South Africa.

Overview Summary

Logitech C920s Pro HD Webcam - Full HD 1080p with Privacy Shutter

The Logitech C920s Pro HD Webcam is designed for users who need reliable, high-quality video for professional and personal communication. Its Full HD 1920 x 1080 resolution at 30 frames per second produces detailed video, while the five-element glass lens and autofocus help maintain clear images. The fixed 78-degree diagonal field of view frames the user and their surroundings for video conferences, online presentations and recordings.

Automatic HD light correction with Logitech RightLight 2 technology adjusts to changing lighting conditions, helping improve image visibility in dim or backlit environments. Two integrated stereo microphones capture natural-sounding voice audio, while the privacy shutter can be closed when the camera is not required. The USB-A connection and universal mounting clip make it suitable for compatible computers and monitor setups.

Performance tier: Full HD productivity and content creation

Uses: Video conferencing, remote work, online learning, virtual meetings, live streaming, video recording, online presentations, personal video calls

Overview

C920s delivers remarkably crisp and detailed Full HD video (1080p at 30fps) with a full HD glass lens, 78degrees field of view, and HD auto light correction-plus dual mics for clear stereo sound. Everything you need to look great in conference calls and record polished demos.

Description

The Logitech C920s Pro HD Webcam (960-001252) is a versatile USB webcam designed to deliver clear video and audio for everyday communication, professional meetings and content creation. With Full HD 1080p video recording at 30fps, it captures detailed images suitable for video calls, remote collaboration, online lessons and recorded presentations.

The five-element Full HD glass lens works with autofocus to maintain image clarity as you move naturally during a call or recording. Its 78-degree diagonal field of view provides a balanced frame for individual users and their immediate surroundings. Logitech RightLight 2 automatic light correction helps optimise image brightness and contrast when lighting conditions change, including dimly lit or backlit environments.

Two integrated microphones provide stereo audio capture, helping your voice sound clear and natural during conversations. The built-in privacy shutter closes over the lens when the webcam is not in use, offering a simple way to maintain visual privacy.

The universal mounting clip is designed to fit compatible laptops, LCD screens and monitors. A tripod mounting option provides additional flexibility when a separate tripod is used. With its USB connection and compatibility with supported operating systems and video calling applications, the C920s is suitable for home offices, business workstations, students, streamers and everyday video communication.

Features

The Logitech C920s Pro HD Webcam combines Full HD imaging, automatic focus, integrated stereo sound and practical privacy features in a compact design.

- Full HD 1080p video: Captures detailed video at 1920 x 1080 resolution and 30fps for professional meetings, video calls and recordings.
- 720p HD video support: Supports 1280 x 720 video at 30fps for compatible applications and settings.
- Five-element glass lens: Designed to deliver sharp images and clear colour reproduction.
- Autofocus: Automatically adjusts focus to help maintain image clarity during calls and recordings.
- 78-degree diagonal field of view: Frames the user and a suitable amount of the surrounding workspace.
- RightLight 2 automatic light correction: Adjusts to lighting conditions to help produce brighter, more balanced video in challenging environments.
- Dual stereo microphones: Integrated microphones capture voice audio from different angles for natural-sounding conversations.
- Privacy shutter: Covers the camera lens when the webcam is not in use.
- Universal mounting clip: Supports mounting on compatible laptops, LCD screens and monitors.
- Tripod mounting option: Allows use with a compatible tripod, sold separately.
- USB connectivity: Connects to a compatible computer through USB-A.
- Content creation support: Compatible Logitech software can provide supported camera customisation and recording tools.

GREAT VIDEO CALLS. PRIVACY INCLUDED.

Make a strong impression in your video conference calls with a diagonal, fixed 78degrees field of view to perfectly frame you and your space-plus full HD at 1080p/30fps or 720p/30fps. The five-element glass lens captures razor-sharp images and clear colors, while autofocus adjusts smoothly and precisely for consistent definition and fluid video. Flip the privacy shutter closed when you want to be off-camera.

DUAL-MIC STEREO AUDIO

Two microphones, one on either side of the camera, capture more realistic sound from a broader range of angles-so your voice comes through sounding natural and clear in conference calls.

ALL-IN-ONE CONTENT CREATION WITH CAPTURE

Easily create, record, and customize settings with our Capture app. A suite of features lets you fully edit and customize your stream, so you can add transitions and text overlays, customize webcam settings, and more.

OPTIMAL LIGHTING

Equipped with automatic HD light correction, the C920s uses Logitech's RightLight™ 2 technology to adjust to your lighting conditions, producing bright, contrasted images, even if you're in a dim setting.

VIDEO CALLS IN FULL HD CLARITY

C920s delivers remarkably crisp and detailed Full HD video (1080p at 30fps) with a full HD glass lens, 78degrees field of view, and HD auto light correction-plus dual mics for clear stereo sound. Everything you need to look great in conference calls and record polished demos. The attachable privacy shutter protects the lens and keeps your privacy when you need it.

HD GLASS LENS WITH PRIVACY COVER

The full HD five-element glass lens and premium autofocus capture razor-sharp, clear images, adjusting smoothly and precisely to provide consistent high definition in conference calls. A convenient privacy cover protects the lens-and your privacy.

What's in the Box

- Logitech C920s Pro HD Webcam with attached 1.5 m USB cable
- Privacy shutter

FAQ

What is the maximum video resolution of the Logitech C920s Pro HD Webcam"

The Logitech C920s supports Full HD video at 1920 x 1080 resolution and 30 frames per second. It also supports 1280 x 720 HD video at 30fps.

Does the Logitech C920s webcam have a privacy shutter"

Yes. The C920s includes a privacy shutter that covers the camera lens when the webcam is not in use.

Does the Logitech C920s Pro HD Webcam have a built-in microphone"

Yes. It features two integrated stereo microphones designed to capture natural-sounding voice audio for video calls and

meetings.

Does the Logitech C920s webcam support autofocus"

Yes. Its autofocus system adjusts the lens automatically to help maintain clear images during video calls and recordings.

Can the Logitech C920s be used for online meetings and remote work"

Yes. Its Full HD video, autofocus, automatic light correction and stereo microphones make it suitable for remote work, video conferencing, online presentations and virtual collaboration.

Can the Logitech C920s be used for live streaming"

Yes. It supports Full HD video at 30fps and can be used for live streaming and video recording with compatible computers and software. Streaming performance depends on the computer, application and internet connection.

How does the Logitech C920s connect to a computer"

The webcam connects through its attached USB-A cable. The computer must have a compatible USB port and a supported operating system or application.

Can the Logitech C920s be mounted on a monitor or tripod"

Yes. The universal mounting clip is designed for compatible laptops, LCD screens and monitors. It also supports tripod mounting, but the tripod is sold separately.

Does the Logitech C920s work with macOS and ChromeOS"

Yes. The webcam supports macOS 10.10 or later and ChromeOS, subject to the requirements of the computer and the video calling application being used.
