Performance tier: Professional productivity

Uses: Office work, business productivity, graphic design, content creation, dual-monitor setups

Overview:

HP Series 5 Pro 24 inch WUXGA Monitor 524pn is built for modern workspaces where clarity, comfort, and flexibility matter. Its 24 inch IPS display delivers extra vertical space with a 16:10 aspect ratio, making everyday tasks like documents, spreadsheets, and creative work easier to manage. A clean, micro-edge design and smooth 100 Hz refresh rate help create a focused, productive setup whether used alone or as part of a dual monitor workstation.

Description:

This 24 inch WUXGA IPS monitor combines sharp 1920 x 1200 resolution with accurate 100 percent sRGB color for consistent, vibrant visuals. A 100 Hz refresh rate and 5 ms response time support smooth motion, while advanced ergonomics including height, tilt, swivel, and pivot adjustments help users stay comfortable throughout the day. With versatile connectivity and integrated eye comfort technology, it is designed to support long hours of efficient work.

Features:

Sharper visuals for everyday work
The WUXGA resolution provides more screen height than standard Full HD, allowing you to see more content with less scrolling. IPS panel technology maintains color accuracy and image consistency across wide viewing angles, making collaboration and multi-tasking easier. Enhanced contrast and 350 nits brightness ensure clear detail in both bright and shaded areas.

Built to fit your workspace
A three sided micro-edge bezel creates a modern, uncluttered look and minimizes gaps in multi-monitor setups. The flat panel design pairs well with adjustable stands or VESA mounting, giving you freedom to tailor your desk layout without distraction.

Comfort you can adjust
Four way ergonomic adjustment lets you fine tune height, tilt, swivel, and pivot for a natural viewing position. Integrated low blue light technology helps reduce eye strain without affecting color accuracy, supporting comfort during extended work sessions.

Smooth and responsive performance
With a maximum refresh rate of 100 Hz, motion appears fluid and responsive across everyday applications. This makes scrolling, window movement, and light visual tasks feel smoother and more precise.

Connections that keep you moving
Designed to integrate easily into professional setups, the monitor supports both DisplayPort and HDMI inputs alongside a built-in USB hub. This allows convenient access to peripherals and streamlined cable management from a single display.
