Dell Memory upgrade 16GB 2Rx8 DDR4 RDIMM 3200MHz

Product Overview

Dell AB257576 Memory upgrade 16GB 2Rx8 DDR4 RDIMM 3200MHz

Specifications

Features:

Random Access Memory (RAM) is a type of hardware that your computer uses to store information. Adding memory is one of the most cost-effective ways to improve your computer's performance.

Dell Branded memory offered in the Memory Selector has gone through rigorous quality assurance and quality control testing to ensure it will work with your specific Dell System so it is fully compatible and supported by Dell. Getting unqualified or generic products from other vendors can cause downtime that can seriously cost your business and put your entire system at risk.

Memory offered now may differ in speed from the original system memory but has been qualified to work in the system. When mixed, the memory will perform at the lowest speed populated or the highest speed allowed by the system.

Compatibility

- Dell Memory Upgrades are the same parts that we use in original Dell systems. They will work right the first time, and we guarantee they will be compatible.
- Dell Memory is built using industry leading OEM grade quality parts.
- Only first pass yielded product is acceptable to meet Dells high-quality standard, only available when purchased from Dell.

Technical Support

- Our experienced technical support staff is available to answer any questions regarding your Dell Memory upgrade.
- Memory that is not Dell Memory may not be supported by Dells Technical Support.
