Product Overview

Microworld HDMI Male to HDMI Female 90 degree Adapter; Left to right connection; HDMI Type A; Plug and play; Cable routing for tight spaces; Compatible with TVs, monitors, laptops, gaming consoles and media devices

Specifications

About this product

The Microworld ADA004 HDMI Male to HDMI Female 90 degree Adapter is a compact HDMI Type A adapter designed to redirect an HDMI connection for easier cable routing in tight spaces. Its male to female configuration provides a practical solution for connecting HDMI cables to TVs, monitors and other compatible HDMI devices where a straight connection may be difficult to manage. Buy now from our website for a convenient HDMI connection solution.

Overview Summary

Microworld ADA004 HDMI Male to HDMI Female 90 degree Adapter is a compact HDMI adapter with an HDMI male connector and HDMI female connector in an angled design. The adapter redirects the HDMI connection to help improve cable routing where space behind a display or device is limited.

The left to right angled configuration can help reduce the amount of space required by an HDMI cable connection and provide a cleaner connection path. It is suitable for compatible HDMI equipment including televisions, monitors, laptops, gaming consoles and media devices.

This plug and play HDMI adapter requires no drivers or additional software. It provides a simple way to change the direction of an existing HDMI connection while maintaining a standard HDMI male to female connection. Buy for quick delivery in South Africa or shop now and save.

Performance tier: Standard HDMI connection accessory

Uses: HDMI cable routing, TVs, monitors, laptops, gaming consoles, media devices, tight spaces

Description

The Microworld ADA004 is an HDMI Male to HDMI Female 90 degree adapter designed to redirect an HDMI connection. The angled form factor is useful when an HDMI port is positioned close to a wall, cabinet, monitor stand or other obstruction where

a conventional straight HDMI cable connection may require additional clearance.

The adapter uses a standard HDMI male connector on one side and a standard HDMI female connector on the other side. This allows an existing HDMI cable to be connected through the adapter while changing the direction of the cable connection.

The ADA004 is suited to a range of HDMI equipment, including TVs, monitors, laptops, gaming consoles and media devices. Its compact design makes it a practical accessory for installations where cable direction and available space are important considerations.

Installation is straightforward because the adapter is a passive plug and play connection accessory. No drivers, software or external power are required. Simply connect the male HDMI end to a compatible HDMI port and connect an HDMI cable to the female HDMI port.

Features

The Microworld ADA004 provides a simple way to redirect an HDMI cable connection without replacing the existing cable.

- HDMI male to HDMI female configuration
- 90 degree angled connection design
- Left to right angled HDMI connection
- Helps route HDMI cables in tight spaces

FAQ

What is the Microworld ADA004 used for?

The Microworld ADA004 is used to redirect an HDMI connection by changing the direction of an HDMI male to female connection. It is particularly useful where space around an HDMI port is limited.

What type of HDMI connectors does the ADA004 use?

The adapter has an HDMI Type A male connector on one side and an HDMI Type A female connector on the other side.

Is the Microworld ADA004 a 90 degree HDMI adapter?

Yes. The ADA004 has a 90 degree angled design that redirects the HDMI cable connection.

Which devices can use the ADA004?

The adapter can be used with compatible HDMI equipment such as TVs, monitors, laptops, gaming consoles and media devices.

Does the ADA004 require drivers or software?

No. The adapter is a plug and play connection accessory and does not require drivers, software or external power.

Can the ADA004 help with HDMI cable routing?

Yes. Its angled design can help redirect an HDMI cable and reduce the space needed behind or beside a compatible HDMI device.
