About this product

The SonicGear Airphone 8 Long Black Bluetooth Headphones (AIRPHONE8LBLK) deliver rich bass and clear audio for everyday music, entertainment and calls. Featuring Bluetooth 6.0, large 40 mm drivers, three selectable EQ modes and up to 10 hours of playback at 50% volume, these foldable over-ear headphones offer versatile wireless and wired listening. Vegan leather ear cushions and a lightweight, adjustable design provide comfortable everyday wear, while the 3.5 mm AUX connection allows continued listening in wired mode. Buy the SonicGear Airphone 8 headphones online in South Africa for convenient personal audio at home, at work or on the go.

Overview Summary

SonicGear Airphone 8 Long Black Bluetooth Headphones

The SonicGear Airphone 8 is a foldable wireless over-ear headphone designed for music lovers, commuters and everyday users. Bluetooth 6.0 connectivity provides wireless audio with a supported operating range of up to 15 metres. The 40 mm dynamic drivers and strong bass enhancement deliver impactful low frequencies alongside clear mids and highs for music, videos and general entertainment.

Choose between Bass Mode, High Pitch Mode and Vocal Mode to adjust the sound profile to your listening preferences. The rechargeable 300 mAh lithium polymer battery provides up to 10 hours of playback at 50% volume. Vegan leather ear cushions, a lightweight adjustable design and foldable construction make these headphones convenient for daily listening and travel. The 3.5 mm AUX connection also provides a wired listening option.

Performance tier: Everyday wireless audio

Uses: Music listening, smartphone audio, tablet audio, laptop audio, video streaming, home entertainment, commuting, travel, everyday listening, wired audio playback

Description

The SonicGear Airphone 8 Long Black Bluetooth Headphones combine versatile connectivity, adjustable sound profiles and a practical foldable design for everyday audio enjoyment. Designed for wireless convenience, these over-ear headphones connect to compatible Bluetooth devices for listening to music, watching videos and enjoying other audio content without a wired connection.

The 40 mm dynamic drivers reproduce a broad audio frequency range of 20 Hz to 20 kHz. Strong bass enhancement adds depth to music, while the selectable EQ modes allow users to choose a preferred sound profile. Bass Mode emphasises low-frequency sound, High Pitch Mode suits listeners who prefer a brighter sound profile, and Vocal Mode focuses on vocal clarity.

Bluetooth 6.0 supports wireless connectivity with a stated operating range of up to 15 metres under suitable conditions. For added flexibility, the headphones support a wired connection through the 3.5 mm AUX input. This allows listening through a compatible audio device using an AUX cable when wireless operation is not preferred or the battery is depleted.

The built-in 300 mAh rechargeable lithium polymer battery delivers up to 10 hours of working time at 50% volume. Actual playback time can vary depending on volume, connected devices and usage conditions. The headphones feature vegan leather ear cushions and a lightweight, adjustable over-ear design for comfortable daily use.

The foldable construction makes the SonicGear Airphone 8 easier to store and carry in a bag when travelling, commuting or moving between home and work. Finished in Long Black, these headphones are a practical choice for users looking for wireless audio, adjustable sound modes and wired listening flexibility in one design.

Features

The SonicGear Airphone 8 combines wireless convenience, customisable audio and portable construction for a range of everyday listening needs.

- Bluetooth 6.0 connectivity: Connect wirelessly to compatible Bluetooth-enabled devices for convenient audio playback.
- 40 mm dynamic drivers: Deliver audio across a frequency response of 20 Hz to 20 kHz.

FAQ

What are the SonicGear Airphone 8 headphones?

The SonicGear Airphone 8 Long Black is a foldable over-ear headphone with Bluetooth 6.0, 40 mm dynamic drivers, three EQ modes and wired AUX connectivity.

Are the SonicGear Airphone 8 headphones wireless?

Yes. They support Bluetooth 6.0 for wireless audio playback with compatible devices. They also support wired listening through a 3.5 mm AUX connection.

How long does the SonicGear Airphone 8 battery last?

The built-in 300 mAh rechargeable battery provides up to 10 hours of working time at 50% volume. Actual battery life depends on volume and usage conditions.

What is the wireless range of the SonicGear Airphone 8?

The stated wireless operating range is up to 15 metres. The actual range may vary depending on obstacles, interference and the connected device.

What EQ modes are available on the SonicGear Airphone 8?

The headphones offer Bass Mode, High Pitch Mode and Vocal Mode, allowing users to select a sound profile according to their listening preferences.

Can the SonicGear Airphone 8 be used with a laptop or smartphone?

Yes. The headphones can connect to compatible Bluetooth-enabled smartphones, tablets and laptops. Wired use is also possible when the device supports a compatible 3.5 mm AUX audio connection.

Can I use the SonicGear Airphone 8 with a cable?

Yes. The headphones support wired audio through the 3.5 mm AUX connection. A compatible audio cable and an appropriate audio output are required.

Are the SonicGear Airphone 8 headphones suitable for travel?

Yes. Their foldable construction and lightweight design make them convenient for commuting, travel and everyday storage.

Do the SonicGear Airphone 8 headphones have a built-in microphone?

Some product listings identify a built-in microphone for calls. Confirm microphone functionality and call controls for the specific product supplied before purchasing if hands-free calling is essential.

How do I charge the SonicGear Airphone 8?

ComX Computers

Product Specification Sheet

The headphones use a USB Type-C charging connection. Connect the supplied charging cable to a compatible USB power source and follow the instructions in the user manual.
