Microworld ARC JG895 Foldable 2.4GHz Wireless Optical, Mouse

Product Overview

Microworld ARC JG895 Foldable 2.4GHz Wireless Optical, Mouse, Bending mechanism that serves as an on / off Switch, Uses a Mini USB Receiver, Powered by 2 AAA Batteries

Specifications

Overview Summary:

The Microworld ARC JG895 Foldable 2.4GHz Wireless Optical Mouse is designed for users who need portability without sacrificing everyday control and precision. Its unique arc-shaped body folds flat for easy storage, making it ideal for mobile work setups, travel, and compact laptop bags. Buy now to upgrade your workspace with a lightweight, modern wireless solution.

This wireless mouse operates on a stable 2.4GHz connection via a mini USB receiver, delivering responsive tracking suitable for both office and general computing tasks. The bend-to-power mechanism adds practical convenience, switching the device on or off instantly through its physical form factor.

Performance tier:Mid-range portable wireless peripheral

Uses:Laptop navigation, office productivity, travel computing, general home use

Overview:

Arc Wireless Mouse ARCM - Foldable 2.4GHz Portable Optical Mouse for Laptop and Travel

The Microworld ARC JG895 Foldable 2.4GHz Wireless Optical Mouse is a compact, arc-shaped portable mouse designed for users who need mobility and space efficiency. It is engineered for travel and everyday laptop use, offering a foldable structure that allows it to switch between active and flat modes. Often positioned as a versatile mouse suitable for both productivity and light usage scenarios, it delivers a balance of portability and reliable wireless performance.

Description:

The ARCM Arc Wireless Mouse is designed around a flexible bending mechanism that allows the body to flatten for storage and curve into an ergonomic shape for use. This same mechanism also functions as the power switch, enabling the device to

turn on when curved and power off when flattened. Its lightweight construction and slim profile make it suitable for users who frequently move between workspaces or require a compact peripheral for laptop setups.

The wireless connection operates on a stable 2.4GHz frequency, ensuring consistent responsiveness with reduced interference in typical office and home environments. A mini USB receiver provides plug and play connectivity, eliminating complex setup requirements. The mouse is powered by two AAA batteries, supporting practical everyday usage without the need for charging infrastructure.

Key benefits include:

- Foldable arc structure for compact storage and portability
- Automatic power control through bending mechanism
- Stable 2.4GHz wireless connection with frequency hopping technology
- Lightweight and travel friendly construction
- Optical tracking system suitable for general computing tasks

Features:

Foldable Arc Design and Portability

The defining characteristic of this mouse is its flexible arc design, which allows it to transition between a flat and curved form. When flattened, it becomes highly portable and can easily fit into a laptop bag or pocket. When arched, it transforms into a full functional mouse with an ergonomic grip. This dual-purpose structure enhances usability for mobile professionals and frequent travelers.

Wireless Performance and Connectivity

Equipped with 2.4GHz wireless technology, the device supports a stable connection within a working range of up to 10 meters. The system uses a 16-channel frequency hopping spread spectrum to minimize signal disruption and maintain responsiveness during use. The mini USB receiver ensures quick installation across compatible systems.

Technical Details and Compatibility

Part Number / SKU: ARCM

- Optical sensor for standard precision tracking
- Wireless frequency: 2.4GHz
- Operating range: up to 10 meters (approximately 30 feet)
- Power supply: 2 x AAA batteries
- Operating voltage: DC 3V-8mA
- Receiver type: Mini USB dongle
- Weight: approximately 45g (package weight)
- Compatible systems: Windows and Mac OS

The Microworld ARC JG895 Foldable Wireless Mouse is suited for users seeking a compact, space saving input device that prioritizes portability without sacrificing essential wireless functionality.

Specifications	
Product Code	ARCM

ComX Computers

Product Specification Sheet

Foldable / Arc Design	The Mouse Features a Bending Mechanism that serves as an On / Off Switch
	Bending it up Powers it On, while Flattening it Turns it Off
Wireless Technology	Operates on a 2.4GHz Wireless Frequency with a 16-Channel
	Frequency-Hopping spread spectrum
Range	Maximum Working Range Is Approximately 30 feet (10 meters)
USB Receiver	Uses a Mini USB Receiver (Dongle) for Connection
Design & Portability	Lightweight (Approx. 45g Package Weight) with a Stylish, Ergonomic Shape
Power	Powered By 2 AAA Batteries (Included)
Sensor	Optical, with High Accuracy for Home and Office Use
DC	3V-8mA
Compatible With	Windows, Mac OS
