Armaggeddon ARGB Kit 6000 Pro White Cooling 12cm Fan Kit

## Product Overview

Armaggeddon ARGB Kit 6000 Pro White Cooling 12cm Fan Kit

## Specifications

### About this product

The Armaggeddon ARGB Kit 6000 Pro White Cooling 12cm Fan Kit delivers vibrant addressable RGB lighting with powerful airflow and intelligent master-slave synchronization for PC cooling and aesthetics. Buy this fan kit from our online store for enhanced cooling and stunning lighting effects in your South African build today.

### Overview Summary

**Product:**Armaggeddon ARGB Kit 6000 Pro White Cooling 12cm Fan Kit

The Armaggeddon ARGB Kit 6000 Pro is a 4 fan cooling solution with one master and three slave 12cm ARGB fans designed for PC air cooling and lighting customization. Each fan features high quality alloy hydraulic bearings for reliable operation and low noise performance with airflow suited for efficient case air movement. The addressable RGB lighting allows individual LED control to create dynamic color patterns and effects that sync across all fans for a cohesive visual presentation.

This kit supports daisy chaining up to eight fans from a single header which simplifies cable runs and enhances internal aesthetics. With a focus on both performance and visual impact, this fan kit is ideal for gaming or high performance PCs that require effective airflow and eye catching lighting.

**Performance tier:**Mid tier cooling and lighting kit

**Uses:**PC case cooling, gaming PC builds, RGB lighting enhancement

### Description

The Armaggeddon ARGB Kit 6000 Pro White Cooling 12cm Fan Kit is engineered for PC enthusiasts who want both effective airflow and addressable RGB lighting in one upgrade. The kit includes one master ARGB fan with control capability and three slave ARGB fans that sync color effects for seamless lighting consistency. Each fan runs up to approximately 1200 +/-300 RPM with 33.84 CFM airflow, generating adequate cooling for general mid tier builds while operating quietly at around 21.3 dBA thanks to alloy hydraulic bearings. The ARGB lighting system lets you tailor static colors or dynamic effects such as

cycles and breathing depending on your motherboard or controller settings. Daisy chaining up to eight fans reduces cable clutter while enhancing your build with eye catching illumination and improved thermal performance. This kit is a reliable choice for those building gaming rigs, creative workstations, or stylish themed PCs in white finish.

## Features

- ARGB Lighting: Addressable RGB allows individual LED control for dynamic lighting effects and personalized color schemes across all fans.
- Master-Slave Sync: One master fan controls all connected fans ensuring uniform lighting effects and simplified control.
- Quiet Operation: Alloy hydraulic bearing and optimized blade design produce low noise levels while maintaining airflow.
- Daisy Chain Support: Allows connecting up to eight fans from one ARGB header to simplify cable management.
- High Airflow: 33.84 CFM per fan provides effective case ventilation and helps maintain lower temperatures during gaming or heavy use.

## What's in the Box

- 1 x ARGB Master 12cm fan
- 3 x ARGB Slave 12cm fans
- Fan mounting screws

## Specifications

- Fan Size: 120 x 120 x 25 mm
- Speed (RPM): 1200 +/-300
- Airflow: 33.84 CFM
- Noise Level: 21.3 dBA
- Bearing Type: Alloy hydraulic
- Blade Count: 9 blades
- Connector: 4 pin large connector
- Lighting: Addressable RGB (ARGB)
- Material: PBT construction
- Daisy Chain Support: Yes

## FAQ

### What does ARGB mean?

ARGB stands for Addressable RGB which means each LED can be individually controlled for custom lighting effects. This allows more advanced color patterns than standard RGB lighting.

### Will this fan kit fit my case?

These are standard 120 mm fans which fit any PC case that supports 120 mm fan mounts. Always check your case fan slots before purchase.

### Can I control the lighting via my motherboard?

Yes, if your motherboard has an ARGB header and supports addressable lighting control, you can sync and customize lighting using your motherboard software.

### How many fans can I connect together?

The master fan supports daisy chaining up to eight fans from a single ARGB header which simplifies installation and cable management.

## Is this kit suitable for gaming PCs?

Yes, this fan kit is ideal for gaming PCs needing enhanced airflow and lighting impact as part of a mid tier cooling solution.
