Specifications

About this product

Buy the Targus ASF24W9EU 24 Inch W (16:9) Monitor Privacy Screen from our South African online store for reliable visual data protection, anti-glare viewing, and blue light reduction in any workspace. This premium privacy filter limits side-angle visibility so only the user directly in front of the screen can clearly see the display, making it ideal for offices, shared environments, and mobile professionals.

Overview Summary

Targus ASF24W9EU 24 Inch Widescreen Privacy Screenis a high-quality monitor filter designed to protect sensitive information on 24 inch 16:9 displays. It uses micro-louver privacy technology to restrict viewing angles while maintaining clear front-facing visibility for the user.

This privacy screen also includes anti-glare and blue light filtering properties, improving visual comfort during long working hours. It is compatible with touchscreen monitors and supports multiple mounting options for easy installation and removal without permanent damage to the display.

The reversible design allows users to switch between a glossy side for improved clarity and a matte side for reduced reflections in bright environments. It is ideal for modern office setups, remote work, and public workspaces where data protection is important.

Performance tier: Professional

Uses: Office work, data protection, remote working, public workspace use, financial documents viewing

Overview

Protect the "data" on your visible screen in the office or on the move. There are some things in life that are great to share. Important personal or company documents are not amongst them. You would not pass your personal photo album or business documents to the person sitting next to you in an airport or on a plane.

The digital age has replaced traditional paper documents and photographs with electronic files and digital pictures. So protect whatever information is on your screen from wandering eyes with a Targus Privacy Screen. The Privacy Screen is a micro slim film that covers the notebook/ LCD screen and only allows normal viewing from directly in front of it, whilst also reducing glare from the screen and protecting it from damage.

Description

The Targus ASF24W9EU privacy screen is engineered for 24 inch widescreen monitors with a 16:9 aspect ratio. It helps safeguard confidential information by narrowing the viewing angle so on-screen content is only visible to the user positioned directly in front of the display.

Designed for professional environments, this filter reduces glare from ambient lighting and minimizes blue light exposure to improve eye comfort during extended use. The durable film construction helps protect the screen surface from scratches and everyday wear.

Its frameless design ensures a clean, professional appearance, while multiple attachment methods allow flexible installation depending on user preference. The screen can be removed and reinstalled as needed, making it suitable for both permanent and temporary setups.

Features

- 24 inch widescreen privacy filter with 16:9 aspect ratio compatibility

FAQ

How does the Targus ASF24W9EU privacy screen work?

It uses micro-louver technology that narrows the viewing angle so the screen is only visible from directly in front, blocking side views.

Is this privacy screen compatible with touchscreen monitors?

Yes, it is designed to work with touchscreen displays without significantly affecting responsiveness.

Does the screen reduce eye strain?

Yes, it includes anti-glare and blue light filtering properties to help reduce eye strain during long usage periods.

Can the privacy screen be removed and reused?

Yes, it can be installed and removed using tabs or adhesive strips, allowing repositioning when needed.

Will it fit any 24 inch monitor?

It is designed for 24 inch widescreen monitors with a 16:9 aspect ratio for best fit and performance.
