ASUS P509 ROG KERIS

Asus P509 ROG KERIS RGB Gaming Mouse

Product Overview

Asus P509 ROG KERIS RGB Gaming Mouse, Connectivity: USB2.0, Resolution: 16000dpi, AURA Sync

Specifications

Features:

MADE FOR PROS
ROG Keris is a featherweight 62-gram FPS gaming mouse with a specially tuned 16,000 dpi sensor. It features ROG-exclusive push-fit switch sockets and ROG Micro Switches, along with left and right PBT polymer buttons, ROG Omni Mouse Feet, ROG Paracord and Aura Sync RGB lighting.

ULTIMATE ACCURACY
Every strike is critical. At the heart of ROG Keris is a specially tuned optical sensor for unerring accuracy and precision to take down the competition.

FEATHERWEIGHT DESIGN
An internal honeycomb design provides structural rigidity and helps keep overall weight down to just 62 grams*.

ROG PARACORD
ROG Keris includes the improved ROG Paracord - an extremely flexible and lightweight cable designed to minimize snags and maximize movement. Plus, the raised port design of ROG Keris provides space between the cable and mousing surface to reduce cable drag and noise.

PERFECT FOR ALL RIGHT-HANDED GAMERS
ROG worked with professional gamers during the design phase, using their feedback to create a gaming mouse with exceptional ergonomics. The resulting shape finds the sweet spot, providing a comfortable grip and exceptional control.

ROG MICRO SWITCH
ROG Keris boasts the new ROG Micro Switch with a 70M-click lifespan and gold-plated electro-junction for improved durability and longevity. Strict ROG manufacturing standards ensure each individual switch is inspected and sorted, with both left and right switches paired to keep force deviation between +/- 5 gf for a consistent click feel.

EXCLUSIVE PUSH-FIT SWITCH SOCKET

Exclusive push-fit switch sockets make it easy to hot swap new switches - so you can tailor operating force and feedback to preference, or replace worn or broken switches to extend lifespan.

PBT LEFT AND RIGHT BUTTONS
The left and right PBT buttons have a durable nonslip surface that resists wear or shine, ensuring a consistent feel.

ROG OMNI MOUSE FEET
After a series of tests, the ROG design team determined that mouse feet and directionality affect glide more than size. The 100% Teflon (PTFE) mouse feet on ROG Keris are rounded and 25% smoother than those found on other gaming mice to ensure an effortless glide across any surface.

AURA RGB LIGHTING AND ARMOURY CRATE
Integrated ROG RGB lighting in the logo and scroll wheel can be customized with a near-endless spectrum of colors and an array of dynamic effects. Users can store up to three profiles on the onboard memory, so preferred settings are easily accessible. Plus, Armoury Crate software allows users to easily customize performance and calibration settings or program and map buttons, customize lighting effects, and more.
