ASUS ROG Chakram

ASUS ROG Chakram RGB wireless Gaming Mouse

Product Overview

ASUS ROG Chakram RGB wireless Gaming Mouse, Connectivity: RF 2.4GHz + Bluetooth, Resolution: 100 dpi - 16000 dpi

Specifications

Features:

A NEW SPIN ON PC GAMING
ROG Chakram is a 16,000 dpi, tri-mode wired, 2.4GHz RF and Bluetooth® LE mouse with a programmable, removable joystick that puts superior control right under your thumb. With fast charging, plus wireless Qi, pivoted buttons, detachable magnetic covers and a unique DPI On-The-Scroll feature for easy accuracy adjustment, Chakram is fearsome new fighting force on the gaming front.

OPTIMIZED TRI-MODE CONNECTIVITY
Connect ROG Chakram any way you desire, with dual-wireless 2.4GHz and Bluetooth® LE, plus wired USB connectivity all on tap. Bond instantly via the included 1ms 2.4GHz USB dongle, maximize battery life with Bluetooth LE or attach anytime with a cable - the choice is yours.

ULTRA PERFORMANCE
ROG Chakram is equipped with a high-end optical gaming sensor to deliver the accuracy and speed you need. Its 100 to 16,000 dpi sensor tracks movements flawlessly up to an outstanding speed of 400 inches per second (IPS) at up to 40 g acceleration. You'll also enjoy lag-free responsiveness with a 1,000 Hz polling rate in both 2.4GHz and wired mode for ultrasmooth gaming experiences.

PROGRAMMABLE JOYSTICK
ROG Chakram's built-in joystick means you can dispense with a gamepad, keeping your hands on the mouse and keyboard. It can be configured to perform in one of two distinct modes - analog or digital - to fit different needs. You can even choose between a long or a short stick, both supplied, or remove the stick completely.

Analog Mode
When you set ROG Chakram's joystick to Analog Mode it simulates a real analog stick or joypad thumb stick, making it ideal for flight sims and racing game, empowering you to climb, dive , drift, pan the view - or any analog control.

Digital Mode

For first-person-shooter (FPS) or battle-royale arena commands, ROG Chakram's joystick can go digital, providing four programmable directions. Just push to reload, switch weapons, tilt, talk, summon a map, scroll web pages or practically any action imaginable - in games or beyond.

Customizable Joystick
We've included both a long and a short joystick to match different hand shapes and play styles. For times when the stick isn't needed, then whip it off and fit the included socket covers for a flush finish.

ADVANCED POWER SOLUTION
ROG Chakram majors on charging simplicity. Top up rapidly by wire, or charge wirelessly wherever there's Qi.

Fast Charging
Use ROG Chakram's USB Type-C input for up to 12 hours of gameplay from just a 15-minute fast charge.

Qi Charging
Charge ROG Chakram wirelessly with an Qi-compatible charging surface, such as ROG Balteus Qi - our awesome companion RGB gaming mouse pad.

Exceptional Battery Life
ROG Chakram offers exceptional battery life, providing up to 79 hours* gameplay when connected via 2.4GHz RF - powering your play for days or even weeks of real-world use.

EASY DIY
ROG Chakram is loaded with easy DIY features, from its screw-less magnetic buttons and cover to exclusive push-fit switch sockets and customizable badge, providing loads of freedom to make Chakram your own.

Screw-less Magnetic Buttons
The mouse buttons also detach magnetically, enabling fast access to the swappable switches without a screwdriver.

Screw-less Magnetic Cover
The detachable magnetic top plate slides off quickly and easily, no tools required.

Exclusive Push-Fit Switch Socket
It take just a moment to swap the switches, making it easy to drop in ones that fit your preferred operating force and feedback - or replace worn or broken switches to extend ROG Chakram's lifespan.

Customizable Badge
The ROG logo is proudly displayed and we've also included a customizable blank badge, ready for you to make your ROG Chakram truly unique.

FOR THE ULTIMATE EXPERIENCE
ROG Chakram is engineered to deliver exceptional gaming experience, and brimming with features to elevate it a level above the competition.

Pivoted Button Mechanism
Shorter travel means quicker clicks, which is why our engineers equipped ROG Chakram with pivoted buttons. The mechanism utilizes springs and metal hinges to balance the keys and minimize the distance between the buttons and switches. The upshot is minimal travel and rapid return, ensuring superb speed, responsiveness and consistency with every click.

DPI On-The-Scroll
ROG Chakram's DPI On-The-Scroll feature lets you adjust accuracy easily, no software required. Just press and hold the DPI

button and then spin the scroll wheel to set the sensitivity freely. Alternatively, just click the button to cycle through four different DPI levels.

AURA LIGHTING
Take style to the next level with ASUS Aura Sync RGB lighting. Fully customize your mouse using an endless spectrum of colors and a range of dynamic lighting effects. All illuminations can be synced with an ever-growing portfolio of Aura Sync-capable hardware to create a truly personalized gaming den.

ARMOURY II
ASUS Armoury II is an enhanced driver-based peripherals configuration utility that offers extensive controls. An intuitive UI lets you easily tune ROG Chakram to suit your gameplay - adjust performance and surface calibration settings, program and map buttons, tailor the joystick input, customize lighting effects and more. You can even track hardware stats during gameplay for data analysis.
