

ATX007

Microworld 20cm 6 pin Gfx Female to 8 pin Male Cable

Product Overview

Microworld 20cm 6 pin Gfx Female to 8 pin Male Cable; graphics card power adapter; internal PC power cable; compatible desktop PC upgrades

Specifications

About this product

The Microworld ATX007 20cm 6 Pin Gfx Female to 8 Pin Male Cable is a compact graphics card power adapter designed to connect a compatible 6 pin Gfx power connection to an 8 pin PCIe graphics power connection. Its 20cm length provides a practical solution for PC builds where additional power connector compatibility is required. Buy now from our website for a convenient PC power cable solution in South Africa.

Overview Summary

Microworld ATX007 20cm 6 Pin Gfx Female to 8 Pin Male Cable is a compact internal PC power adapter for compatible graphics card power configurations. The cable features a 6 pin Gfx female connector and an 8 pin male connector in a 20cm cable design.

The ATX007 is suited to PC upgrades and system builds where the available graphics power connection and graphics card power input require this type of adapter. Its short 20cm length helps provide a direct connection while avoiding unnecessary cable length inside the computer case.

Performance tier: Entry-level PC power adapter

Uses: Graphics card power connection, PC upgrades, desktop PC builds, internal power cable conversion

Description

The Microworld ATX007 is a 20cm internal PC power adapter designed for compatible graphics card power connections. It provides a 6 pin Gfx female connector on one end and an 8 pin male connector on the other end, allowing a compatible 6 pin Gfx power connection to interface with an 8 pin graphics card power input.

With its compact 20cm cable length, the ATX007 is suitable for desktop computer installations where a short internal power connection is preferred. The cable can be useful when upgrading a PC with a graphics card that uses an 8 pin power

connection while the applicable power cable configuration provides a compatible 6 pin Gfx connection.

This cable is intended for compatible PC power configurations and should only be used where the power supply, cable wiring and graphics card specifications support this type of connection. Check the required power connector and PSU compatibility before installation.

Features

The Microworld ATX007 provides a straightforward connection solution for compatible graphics card power configurations.

- 6 pin Gfx female connector
- 8 pin male graphics power connector
- 20cm cable length
- Designed for compatible internal desktop PC power connections
- Useful for PC upgrades and graphics card installations
- Compact cable length helps reduce unnecessary cable inside the PC case
- Simple adapter design for compatible graphics power configurations

What's in the Box

- 1 x Microworld ATX007 20cm 6 Pin Gfx Female to 8 Pin Male Cable

Specifications

- Brand: Microworld
- Model: ATX007
- Product type: Graphics card power adapter cable
- Input connector: 1 x 6 pin Gfx female
- Output connector: 1 x 8 pin male
- Cable length: 20cm
- Application: Compatible desktop PC graphics power connections
- Colour: Black

FAQ

What is the Microworld ATX007 used for?

The Microworld ATX007 is used to connect a compatible 6 pin Gfx female power connection to an 8 pin male graphics card power connection.

How long is the Microworld ATX007 cable?

The cable is 20cm long.

What connectors does the ATX007 have?

The ATX007 has a 6 pin Gfx female connector and an 8 pin male connector.

Can the ATX007 be used with any graphics card?

No. Compatibility depends on the graphics card power requirements and the wiring and output capabilities of the power supply. Check the graphics card and PSU specifications before use.

Is the ATX007 suitable for PC upgrades?

Yes. It can be useful for compatible desktop PC upgrades where the available graphics power connection needs to connect to

ComX Computers

Product Specification Sheet

an 8 pin graphics card power input.

What should I check before installing the ATX007?

Confirm that the graphics card requires an 8 pin power connection and that the power supply connection and cable are electrically compatible with the adapter. Do not use the cable if the required power configuration is not supported.
