Digitize Analog Video Effortlessly

AVerMedia EZMaker USB SDK allows you to capture true color video sources and images from any analog video equipment through S-Video/Composite video inputs. Its portability makes it the best solution for mobile applications such as mobile monitoring and analysis.

Exclusive Software Development Kit (SDK)

The enclosed SDK provides a complete tool kit to develop software via various programming languages. You can utilize the API to call the appropriate functions and libraries in our SDK. It can help you to reduce noise, downscale frame rate, overlay video over the current one, adjust color, or de-interlace. Even better, it is also compatible with major programming languages like Visual C++ and Visual Basic!

High Quality API Solution

AVerMedia EZMaker USB SDK provides users a powerful set of API in DLL module for more convenient and efficient development experience. Such as capture and preview content in the video window. Users can also add customized text, date, and timestamp to the video.
