Sheetfed network scanner

- Standalone network scanningRelease the potential of a connected workplace
- File sharingOne touch scan to different destinations
- Reliable paper handlingTake control with ultra-sonic sensors and paper protection
- Speed with controlUse slow mode or scan documents with speeds of up to 40 ppm (80ipm)
- Built-in displayEasy to use 1.44 inch colour LCD

Features:

Sharing made easy

With limited office space, reducing the number of dedicated devices is crucial. With an easy to use control panel with built in 1.44" colour LCD display, you can choose the correct job and send documents to the correct destination without delay, making digital files available across departments and other agencies. Scan to email, folder, FTP, SFTP, cloud services or Microsoft applications at the touch of a button .

High performance

Thanks to a high capacity 100 sheet ADF, user intervention is reduced, allowing you to capture high volumes of documents in one go. With double-sided scan speeds of up to 40ppm/80ipm, bulk jobs can be captured quickly and easily as a single file.

Intelligent features

Take control with a range of intelligent features, including ultra-sonic sensors and a paper protection function. Slow mode allows difficult media to be captured by reducing roller speed, without increasing file sizes. Double feed detection skip means difficult documents like envelopes and post-it notes can be processed rapidly.

Protecting important documents

Paper protection, double feed and dirt detection warning allows documents to be captured carefully and precisely, from 27gsm to 413gsm. The Active Separation Roller System and on-board sensors help prevent document double-feeds and ensures every piece of paper is scanned accurately.

Quick send buttons

Thanks to WebConfig, you can create job presets and assign them to one of three quick send buttons, without the need for a PC or server. Multiple email addresses can be assigned to a single job. Scan once and send to several different contacts. Up to 300 separate contacts can be saved.

Document Capture Pro suite

Take advantage of Epson software. The Epson Document Capture suite of software gives you access to a range of easy-to-use scanning solutions for capturing, separating and routing documents around a business and beyond.
