Performance tier:Mid-range smart

Uses:Air frying, roasting, baking, grilling, reheating, defrosting, fermenting, cooking whole chicken, preparing potato wedges, family meal preparation

Overview:

Xiaomi Smart Air Fryer 6.5L Black - Smart Cooking with 360 Degree Convection

6.5L smart air fryer | 360 degree convection heating | 12 preset modes | App & Google Assistant control | Automatic warming

Description:

The Xiaomi Smart Air Fryer 6.5L combines generous cooking capacity, powerful 1800W performance and smart connectivity for convenient everyday cooking. Its 360 degree convection heating system distributes hot air evenly around the food, helping deliver crisp and consistent results without the need to turn food during cooking. With 12 preset cooking modes, manual controls, a wide 40 degree C to 220 degree C temperature range and smart app control, it is suitable for everything from defrosting and fermentation to baking, roasting and air frying.

The 6.5L capacity makes this Xiaomi air fryer a practical choice for families, entertaining and larger meals. Smart controls through the Mi Home or Xiaomi Home app allow you to schedule cooking up to 24 hours in advance, browse 100 cloud recipes and monitor the cooking process remotely. Google Assistant compatibility also provides convenient voice control.

Features:

Large 6.5L Capacity for Family Meals

With a rated 6.5L capacity, the Xiaomi Smart Air Fryer provides plenty of room for larger portions. It can accommodate meals such as a whole chicken, crispy potato wedges, roasted vegetables and other family favourites.

The 1800W power output provides strong heating performance, while the upgraded circular air duct improves airflow distribution throughout the cooking chamber. This helps hot air reach the food more evenly and reduces the need to manually flip ingredients during cooking.

360 Degree Convection Heating for Even Results

The upgraded 360 degree convection heating system is designed to circulate hot air efficiently around the frying basket. This produces more consistent cooking and crisping across the food, making the air fryer useful for a wide range of recipes.

NTC smart temperature control continuously monitors the cooking temperature, with an adjustable range from 40 degree C to 220 degree C. This broad range supports different cooking requirements, including defrosting, fermentation, baking and high-temperature roasting.

Healthier Air Frying with Degrease Function

The dedicated degrease function helps remove excess fat and oil during cooking, allowing you to prepare crispy meals with less reliance on traditional frying methods. It is suited to users looking for a convenient way to prepare lighter versions of everyday favourites without sacrificing texture.

After cooking, the automatic 30-minute warming function helps keep food warm, crisp and ready to serve. This is useful when meals are not being served immediately after the cooking cycle finishes.

Smart Xiaomi Air Fryer App Control

Connect the Xiaomi Smart Air Fryer to the Mi Home or Xiaomi Home app for convenient control from a smartphone. You can schedule cooking up to 24 hours ahead, check cooking progress and access a library of 100 one-touch cloud recipes.

Google Assistant compatibility adds voice control, allowing compatible users to start or adjust cooking using voice commands. The air fryer itself uses an LCD smart display and spin-and-tap dial, making it straightforward to select cooking programs and adjust temperature and time settings.

12 Cooking Modes and Manual Control

The Xiaomi Smart Air Fryer includes 12 preset cooking programs for convenient preparation of different foods. A manual mode provides additional flexibility when you want to set your own cooking time and temperature.

Key cooking functions include:

- 12 preset cooking modes plus manual cooking control.
- Temperature adjustment from 40 degree C to 220 degree C.
- 360 degree convection heating for more even cooking.
- NTC temperature monitoring for precise heat control.
- Automatic 30-minute warming after cooking.
- Dedicated degrease function for reducing excess fat and oil.
- Auto-pause when the frying basket is removed.
- 2.4GHz Wi-Fi connectivity for smart app functions.
- Google Assistant compatibility.
- LCD display with spin-and-tap control dial.
- Food-grade non-stick basket coating for easier cleaning.

Practical Design for Everyday Cooking

The removable basket includes a food-grade non-stick coating to make cleaning easier after cooking. The auto-pause function also stops the cooking process when the basket is removed, allowing ingredients to be checked or added during preparation.

The compact design provides a useful balance between cooking capacity and countertop practicality, with dimensions of 38.9 x 28.7 x 31.7cm and a product weight of 5.4kg.
