Product Overview

Xiaomi Outdoor Camera Base Station; Support BW300 BW500; SD storage 16-256GB; 2.4GHz WiFi hub; MJA1 security chipset; instant event alerts

Specifications

About this product

The Xiaomi Outdoor Camera Base Station BHR8618GL in white is a dedicated hub that strengthens and extends the connectivity of compatible Xiaomi outdoor cameras while providing local SD card storage support up to 256GB and instant event alerts for reliable home security.

Overview Summary

Product: Xiaomi Outdoor Camera Base Station BHR8618GL White

The Xiaomi Outdoor Camera Base Station is engineered to centralise your smart home security setup with robust wireless connectivity and dependable signal strength for supported outdoor cameras. This base station enhances camera range and stability by acting as a wireless relay bridge and hub that ensures consistent monitoring, day and night, over extended outdoor areas. With support for SD card storage from 16GB to 256GB, it offers local storage flexibility without ongoing subscription fees. The advanced MJA1 finance-grade security chipset adds an extra layer of data protection for peace of mind.

Its simple plug-and-play installation means you can get your system up and running quickly, with automatic event detection alerts and playback support for captured footage. The unit operates effectively with Android and iOS devices and fits seamlessly into existing Xiaomi smart security ecosystems.

Performance tier: Mid-range smart home security hub

Uses: Home perimeter security, camera connectivity extender, local video storage, smart home integration

Description

The Xiaomi Outdoor Camera Base Station BHR8618GL is designed to fortify your existing outdoor camera setup by serving as a central controller and connectivity enhancer. This compact white unit interfaces with compatible Xiaomi cameras such as BW300 and BW500 to deliver a stable 2.4GHz WiFi connection and extended signal reach. Supporting local SD storage from 16GB to 256GB, it allows you to save video clips without relying on cloud subscriptions. Featuring automatic event detection and instant user alerts, it provides a dependable security backbone for your property. The advanced MJA1 security chipset safeguards your data and system access, making this base station a key component of a secure smart home network.

Features

Key functional attributes of the Xiaomi Outdoor Camera Base Station BHR8618GL White include:

- Local SD card support: Store recorded video on SD cards from 16GB to 256GB without monthly fees.
- Extended wireless coverage: Acts as a relay bridge to strengthen WiFi connections for outdoor cameras.
- Advanced security chipset: MJA1 finance-grade chipset protects data and access.
- Instant alerts: Receive event detection notifications for real-time security response.
- Easy installation: Plug-and-play setup with minimal configuration.

What's in the Box

- Xiaomi Outdoor Camera Base Station BHR8618GL White x1
- Power adapter x1
- Network cable x1
- User manual x1

Specifications

- Model: BHR8618GL

- Compatibility: Xiaomi Outdoor Camera BW300, BW500
- Wireless: WiFi IEEE 802.11b/g/n 2.4GHz
- Storage: SD card 16GB to 256GB
- Security chipset: MJA1 finance-grade
- Input: 5V/2A
- Operating temperature: -10C to 45C
- Dimensions: 12 x 12 x 6 cm
- Weight: 0.35 kg

FAQ

What cameras does this base station support?

The Xiaomi Outdoor Camera Base Station BHR8618GL supports compatible outdoor cameras such as the Xiaomi BW300 and BW500 models for enhanced connectivity and monitoring.

This base station is designed to work within the Xiaomi smart home ecosystem and helps centralise camera connectivity and video storage.

How much storage can be used with this unit?

The unit supports local SD cards from 16GB up to 256GB, allowing flexible storage for captured footage without the need for cloud services.

This local storage makes it easy to store and review video recordings as needed.

Can I receive real-time alerts?

Yes, the base station features automatic event detection and will send instant alerts when an event is detected by connected cameras.

This allows you to respond quickly to security events as they occur.

Does it improve WiFi coverage for cameras?

The base station is designed to extend and stabilise the 2.4GHz WiFi signal for connected cameras, helping reduce dropouts and maintain better outdoor coverage.

This is especially useful for larger properties with more distant camera placements.
