J5create JDA213 HDMI to VGA Adapter

Product Overview

J5create JDA213 HDMI to VGA + 3.5mm Audio out 150mm cable - support up to WUXGA 1920x1200 / 1080P @60Hz, white, for MAC or PC - retail pack

Specifications

About this product

The j5create JDA213 HDMI to VGA Adapter is a compact display converter designed to connect HDMI equipped computers and multimedia devices to VGA monitors, projectors, and displays while providing a separate 3.5mm audio output. Supporting resolutions up to WUXGA 1920 x 1200 and Full HD 1080p at 60Hz, it is ideal for Mac and PC users who need reliable compatibility with legacy VGA displays. Buy online today for quick delivery in South Africa and enjoy an easy HDMI to VGA connectivity solution.

Overview Summary

j5create JDA213 HDMI to VGA Adapter with 3.5mm Audio Output

The j5create JDA213 converts a digital HDMI video signal into an analog VGA output, allowing modern laptops, desktop computers, media players, and other HDMI devices to connect to VGA monitors and projectors. The integrated 3.5mm audio output provides separate stereo audio for speakers or sound systems, making it suitable for presentations, classrooms, offices,

Product Specification Sheet

and home entertainment.

The adapter supports PC resolutions up to WUXGA 1920 x 1200 at 60Hz and HDTV resolutions up to 1080p at 60Hz. Installation is simple with no software or driver required. A Micro USB power input is available for devices that cannot provide sufficient power through the HDMI connection. Compatible with both Mac and Windows systems, the compact white adapter is easy to carry and install wherever VGA connectivity is required.

Performance tier: Professional HDMI to VGA Display Adapter

Uses: Office displays, projectors, classroom presentations, business meetings, legacy VGA monitors, conference rooms, home entertainment

Overview

The j5create's HDMI to VGA adapter JDA213 allows you to connect the HDMI output from your laptop, Ultra book, Desktop, Tablet, Blue ray DVD, Digital set-top box, player, Digital camera, Video camera or gaming console equipment to the VGA input of a monitor or projector by converting the HDMI video signal from the output device into a VGA output and separate 2-channel analog audio. The adapter Supports resolutions including high definition 1080p, up to 1920x1200, which eliminates the expense of upgrading a VGA display for the sake of compatibility. The Adapter can also increase your productivity by extending your computer's desktop onto a secondary monitor, doubling available workspace. This adapter has a high quality, compact design for long term durability and a minimal footprint.

Description

The j5create JDA213 is designed to bridge the gap between modern HDMI equipped devices and legacy VGA displays. It converts HDMI video into VGA while simultaneously providing a dedicated 3.5mm stereo audio output, making it suitable for monitors, projectors, televisions, and presentation equipment that require separate audio connections.

Its plug and play design allows quick installation without software or driver installation, making it suitable for professionals, students, educators, and business users. The adapter supports high quality video output up to WUXGA 1920 x 1200 and Full HD 1080p at 60Hz, delivering clear images for presentations, productivity, and multimedia applications.

The integrated Micro USB power input can provide supplemental power when required by low power HDMI source devices. The compact design and approximately 150mm cable make the adapter convenient for travel and everyday use while maintaining a clean installation.

Features

The j5create JDA213 offers reliable HDMI to VGA conversion with integrated analog audio output for compatibility with a wide range of legacy display equipment.

- Converts HDMI video output to VGA display input.
- Separate 3.5mm stereo audio output.
- Supports WUXGA 1920 x 1200 at 60Hz.
- Supports Full HD 1080p at 60Hz.
- Plug and play operation with no software required.
- Compatible with Mac and Windows computers.
- Micro USB power input available for additional power if required.
- Compact white design with approximately 150mm integrated cable.
- Suitable for monitors, projectors, and VGA displays.

FAQ

What does the j5create JDA213 do?

ComX Computers

Product Specification Sheet

The JDA213 converts an HDMI video signal into a VGA video signal while providing separate 3.5mm stereo audio output.

Does this adapter support Full HD?

Yes. It supports resolutions up to 1920 x 1080 at 60Hz as well as WUXGA 1920 x 1200 at 60Hz.

Is the adapter compatible with Mac and Windows?

Yes. It works with compatible Mac and Windows computers that provide an HDMI output.

Do I need to install drivers?

No. The adapter is plug and play and does not require software installation.

Can I connect a projector with this adapter?

Yes. It is designed for VGA projectors, monitors, televisions, and other VGA display devices.

Why is there a Micro USB port?

The Micro USB input provides optional supplemental power if the connected HDMI source cannot supply sufficient power to the adapter.
