Unitek Y-C504G 3m Svga Male To Male 3c+6 Cable

Product Overview

Unitek Y-C504G 3m Svga Male To Male 3c+6 Cable

Specifications

About this product

The **Unitek Y-C504G 3m SVGA Male To Male 3C+6 Cable** is a high quality VGA video interconnect with gold plated connectors and robust shielding designed for reliable analog video transmission up to 1920 x 1080 resolution between VGA enabled devices.

Overview Summary

The **Unitek Y-C504G 3m SVGA Male To Male 3C+6 Cable** is a durable VGA (HD15) cable ideal for connecting desktops, laptops, projectors and monitors with standard VGA ports. Built with quality bare copper conductors and gold plated connectors, this cable enhances signal integrity and reduces interference for clear, stable video output. Its 3 meter length supports flexible setups in home, office and presentation environments.

Designed for universal compatibility with VGA supported displays, it supports full high definition video up to 1920 x 1080p and features shielding to protect against EMI and RFI noise. Easy to install with secure male to male connectors, the Unitek SVGA cable is a practical choice for extending VGA connections while maintaining reliable performance across your devices.

Performance tier: Standard connectivity

Uses: PC to monitor connection, projector link, VGA display extension, office AV setup, classroom AV connection

Description

The Unitek Y-C504G 3m SVGA Male To Male 3C+6 Cable delivers a reliable analog video connection between VGA enabled devices such as computers, projectors and monitors. With a 15 pin HD15 interface, both ends of the cable provide secure male to male VGA connection that supports high definition resolutions up to 1920 x 1080p. Constructed with gold plated contacts and bare copper conductors, it improves conductivity and minimizes signal loss over the 3 meter length. The cable also benefits from aluminum foil shielding and ferrite core beads that protect against electromagnetic and radio frequency interference, ensuring a stable display signal for professional and personal AV applications. Easy to install and universally compatible, this SVGA cable is an essential accessory for extending analog video connections in home and office

environments.

Features

- 3 meter long VGA (HD15) male to male video cable for flexible device placement.
- Gold plated connectors and bare copper wiring for enhanced signal quality and corrosion resistance.
- Supports high resolution video up to 1920 x 1080p for crisp images on VGA displays.
- Aluminum foil shielding and ferrite beads reduce EMI and RFI interference.
- Universal compatibility with all VGA supported devices including PCs, laptops, projectors and monitors.

What's in the Box

- 1 x Unitek Y-C504G 3m SVGA Male To Male 3C+6 Cable

Specifications

- Cable length: 3 meters
- Connector type: VGA (HD15) male to VGA (HD15) male
- Supported resolution: Up to 1920 x 1080p
- Wiring: Bare copper conductors
- Shielding: Aluminum foil with ferrite beads
- Gold plated contacts: Yes
- Compatibility: VGA enabled monitors, PCs, laptops, projectors
- Colour: Black

FAQ

What devices can I connect with this VGA cable?

This cable is designed to connect any two devices with standard VGA (HD15) ports, such as desktop PCs, laptops, monitors and projectors. Ensure both devices have a VGA interface for compatibility.

Does this cable support high definition video?

Yes, the Unitek Y-C504G supports video resolution up to 1920 x 1080p, making it suitable for HD displays and presentations when used with compatible equipment.

How long is the cable?

The cable measures 3 meters in length, providing ample reach for typical office and home AV setups without signal degradation when used for standard VGA connections.

Is the cable shielded against interference?

Yes, it features aluminum foil shielding and ferrite beads to help reduce electromagnetic and radio frequency interference for a more stable video signal.
