

CAB-USB-EXTA-20M-U

Unitek Y-279 20m USB 2.0 Active Extension Cable

Product Overview

Unitek Y-279 20m USB 2.0 active extension cable, Additional USB Type-A Port for Power Supply

Specifications

About this product

The **Unitek Y-279 20m USB 2.0 Active Extension Cable** is a high quality active repeater cable that extends USB 2.0 connections up to 20 meters while maintaining reliable data transmission up to 480Mbps and backward compatibility with USB 1.1.

Overview Summary

Unitek Y-279 20m USB 2.0 Active Extension Cable delivers dependable long range USB connectivity for devices that require extended reach beyond standard cable limits. Featuring an integrated USB 2.0 active repeater chipset, this cable enhances signal stability over distances up to 20m, making it ideal for connecting peripherals without data loss or signal degradation. Its plug and play design allows fast setup without drivers or configuration, while the optional additional USB Type-A power port supports devices with higher power requirements.

This extension cable is perfect for connecting printers, scanners, webcams, external storage and other USB devices that benefit from extended reach. With robust copper wiring and broad device compatibility, it offers an efficient solution for both home and office installations requiring extended USB connections.

Performance tier: Premium USB extension solution

Uses: USB device extension, peripherals connectivity, long range USB data transfer, home office setups

Description

The **Unitek Y-279 20m USB 2.0 Active Extension Cable** is engineered to surpass the maximum distance limitations of standard USB cables by incorporating an active repeater chipset that strengthens USB signals over long runs. Designed to support USB 2.0 transfer rates up to 480Mbps and backward compatible with USB 1.1 devices, this cable lets you maintain stable connections between hosts and USB peripherals.

Built with quality copper wiring and reliable shielding, it reduces signal loss and interference while providing consistent

performance. The cable also includes an additional USB Type-A power connection option so you can draw extra power when needed for devices that exceed the standard bus power limits.

Its flexible yet robust build makes installation simple while ensuring performance integrity in demanding home or business environments where extended USB reach is required.

Features

The **Unitek Y-279 20m USB 2.0 Active Extension Cable** includes:

- Active repeater chipset to extend USB 2.0 connectivity up to 20m with minimal signal loss.
- Supports UDP 2.0 data rates up to 480Mbps for fast and reliable transfer.
- Backward compatible with USB 1.1 devices for broad peripheral support.
- Additional USB Type-A port for external power support when required.
- Plug and play design with no software or drivers needed.

What's in the Box

- Unitek Y-279 20m USB 2.0 Active Extension Cable
- User manual

Specifications

- Cable length: 20 meters
- USB standard: USB 2.0 with backward USB 1.1 compatibility
- Data transfer speed: Up to 480Mbps
- Connector type: USB Type-A male to USB Type-A female
- Active chipset: Integrated repeater for signal boosting
- Additional power port: USB Type-A port for optional external power
- Color: Black
- Plug and play: Yes

FAQ

What devices can I connect using this USB extension cable?

This USB extension cable is compatible with USB 2.0 and USB 1.1 devices, including printers, webcams, external drives, scanners and other peripherals that need extended reach while maintaining signal integrity. It is not designed to change the USB version of any device.

Is the cable plug and play?

Yes, the cable operates with a plug and play design that requires no additional drivers or software. Simply connect to your host device and peripheral for instant use.

Do I need external power to use this extension cable?

External power is optional and only necessary when the connected device requires more power than the USB bus can provide through the cable alone. Use the additional USB Type-A port for connecting a power source when needed.

Can this cable support data transfer for high speed devices?

This cable supports USB 2.0 data rates up to 480Mbps. While suitable for most peripherals, it cannot increase data speeds beyond USB 2.0 specification limits.
