Features:

V-Shaped Dual Heatsinks
Two independent heatsinks are designed in V-shape to minimize air resistance and optimize airflow, providing the best cooling performance.

Powerful Cooling Performance
Two optimally designed heatsinks disperse heat away from the CPU via 4 heatpipes, while high capacity 120mm fan quickly cools the heatsinks for stable operation of high performance CPUs

Latest LGA 2011 Socket Support
CNPS11X Performa accommodates a broad range of sockets including Intel's latest LGA 2011 sockets as well as AMD's.

High Performance Super Thermal Grease ZM-STG2M Provided

The high performance super thermal grease ZM-STG2M maximizes heat transfer from the CPU to the base of CNPS11X Performa for intensified cooling performance.

DTH (Direct Touch Heatpipe) Base
As applying DTH(Direct Touch Heatpipes) technology, 4 heatpipes in the Base Cover touch the CPU directly and transfer the CPU's heat directly to heatpipes, thereby minimizing heat resistance and maximizing cooling performance in a short time.

FET Cooling Airflow Guide
CNPS11X Performa's patented FCG (FET Cooling Guide) heatsink effectively cools the peripheral areas of the Motherboard and FET (Filed-Effect Transistor) for stable operation.

Ultra Quiet 120mm PWM Fan
Switching noise eliminated 120mm fan incorporated for ultra quiet operation.
